

Van Zyverden's
EVERBEARING STRAWBERRIES EVER SWEET

Eversweet strawberries are so sweet and juicy. The idea of having a steady supply of berries by growing your own from a bed of strawberry plants is tempting and, fortunately, as easy as pie. Our Eversweet variety bears yummy fruit all summer long, unlike some others which only produce in June or spring. As 'Eversweet' shows very good results all over the country, it is the only strawberry variety we offer here because we believe it is the best. Why go with anything else? The variety is heat tolerant and produces large, flavorful berries. They are easy to grow, producing a steady crop throughout the season. Success is guaranteed!

Grow your own

Fun to grow

*Grow in beds, pots
or hanging baskets*

Growing Instructions: Plant early spring so plants can get established before the hot weather. Do not cover the crown of the root. They love the sun so consider that when choosing a location to plant.

Care Tip: Best to plant on cloudy days so the plants do not wilt before you can water them. We know it can be hard, but you will want to pinch the blossoms and the plant runners the first year to ensure the plants will develop a good system the first year.

Exposure: Full sun

Height: Grows 8-10"

Spacing: Plant 12-24" apart, 0" deep

Hardy in: USDA zones 5-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
