

AP-1 GREEN-SEAL®

Heavy Duty Construction Sealant & Adhesive

APOC® AP-1 GREEN-SEAL® is the strongest construction adhesive, delivering unmatched toughness that lasts. This next generation moisture-cure sealant delivers maximum durability and superior adhesion to a wide variety of building materials. With enhanced UV protection, Green-Seal won't crack or peel in exterior applications. Green-Seal has an exceptional application range and cures quickly so you can be sure the job gets done on time, every time. Available in white and gray, AP-1 Green-Seal is also paintable and has no offensive odor and designed with sustainability in mind by minimizing waste, energy consumption and its impact on the environment.

- Quick cure and can be applied from 0 °F to 140 °F.
- Superior adhesion for bonding multi-surface applications under extreme conditions.
- Extreme flexibility and recovery, perfect for areas needing a sealant that withstands high joint movement.
- Extreme strength for the toughest applications with most building materials including tile, metal, wood, insulation, foam and other substrates.

USE FOR: General Construction, Wood, Metal, Stone, Concrete, Fiberglass, Aged Single-Ply
IDEAL FOR SEALING, BONDING AND REPAIRING: Expansion Joints, Doors, Windows, Siding, Gutters, Vents, Ducts, Roofs, Crown Molding, Gaskets, HVAC, etc.
