LIMITED GROWTH & FLOWERING GUARANTEE

Garden State Bulb Co. (GSB) products are grown with the utmost care and are of excellent quality. For best results, follow the instructions included. Because our flower bulbs are natural products, we offer a 1 Year Limited Growth and Flowering Guarantee.

GSB's obligation under this Guarantee is limited to troubleshooting, replacing the product or missing pieces, or providing a gift certificate at GSB's discretion. All products for which a Guarantee claim is made must be received by GSB with sufficient proof of purchase.

This Guarantee does NOT cover improper handling, storing, weathering, failure to follow instructions, improper maintenance, damage caused by acts of nature (wind, lightning, snow, water, ice), or damage caused by improper use of the products—all of the above voids the product warranty. No other guarantee beyond that specifically set forth above is authorized by Garden State Bulb Co.

INDOOR PLANTING & CARE INSTRUCTIONS

PLANTING TIME At the time of purchase

BLOOM TIME 7-10 weeks after planting

LIGHT Bright indirect sunlight

DEPTH 1/3 of the bulb (about 1") should remain above the surface

MATURE HEIGHT 20-24" tall

BENEFITS Double Blooms

TIPS

- 🔥 If the bulb has already started growing, plant it immediately. Otherwise, store in a cool, dry place until ready to plant.
- 🔥 Spread some pebbles or marbles over the planting mix for a polished effect.
- 🔥 Turn the pot regularly to ensure the stem grows straight.
- 🔥 Plant multiple kits in two-week intervals for continuous floral color during the holidays.

NOTE: Plant as soon as possible after purchase. If not planting immediately, store in a cool, dry place with plenty of air circulation.

Amaryllis Indoor Planting Instructions

- 1 Fill a planter container $\frac{2}{3}$ with moist, well-drained soil.
- 2 Place the Amaryllis bulb in the soil with roots facing down.
- 3 Add additional soil around the bulb. $\frac{1}{3}$ of the bulb should remain above the surface.
- 4 Keep the planter in a bright room at a minimum temperature range of 65-70° F.
- 5 Keep the soil moist, not wet.
- 6 Keep blooming flowers out of direct sunlight to prolong blossoms.

After Care

When blooms fade, cut off the tubular flower stems near the top of the bulb, leaving the foliage to continue growing. Water as usual and apply a water-soluble fertilizer every four weeks. After the danger of frost has passed, place your Amaryllis pot outside to enjoy the summer sun. Continue to fertilize every four weeks, which is necessary for the next season of blooms. Bring your Amaryllis inside after summer and allow the bulb to dry out completely in a cool, dry place. Repot your Amaryllis in fresh soil and start the cycle all over again!

FREQUENTLY ASKED QUESTIONS

Q. How long does it take for Amaryllis to bloom?

A. An amaryllis typically takes about 7 to 10 weeks to bloom after planting.

Q. Where is the best place to put Amaryllis to grow indoors?

A. Place the amaryllis in a space where it can bask in abundant natural sunlight and warmth. As growth starts, remember to give the pot a gentle rotation every few days. This practice will help promote the development of upright flower stalks. Once the bulb is flowering, relocate the plant away from direct sunlight.

Q. How do you store Amaryllis bulbs before planting?

A. Plant Amaryllis bulbs soon after purchase, but if you need to wait, store them in a cool, dry, dark place—avoid refrigeration.
