

EPIC
SPECIFIC REPELLENTS FOR
SPECIFIC PESTS

**SNAKE
SCRAM™**

GRANULAR REPELLENT

EASY TO APPLY INSTRUCTIONS

- 1 Before applying, shake/mix repellent thoroughly as settling may have occurred in separating our ingredients.
- 2 Apply by shaking granules in & around the area to be protected.

*This product should **repel snakes immediately**. If necessary, reapply as needed until snake activity ceases and no further snakes are observed.*

- 3 Once repelling action is established, reapply every two (2) weeks. Reapply after heavy rainfalls. Apply in early spring where activity has been observed in the past or at first sign of snake presence. Also in structures or exclusion areas before presence is detected.

Avoid contact with or handling of snakes if you are unfamiliar with snake species and their proper handling. While most snakes are harmless, many varieties can strike & bite if surprised or disturbed by human activity. Also, several species in the United States are poisonous and their venom can be harmful if they bite people or pets.

Do not apply Snake Scram™ directly or indirectly to open water such as ponds, lakes or streams. Do not apply directly to crops being grown for food or feed, instead use as a barrier around such crops.

SCRAM COVERAGE
