Left touch Sensor

⦿ ON/OFF Anti-fog(The defogger power will automatically turn off after an hour)

Right Touch Sensor

⦿ ON/OFF Lighting
tap-tap color change, brightness control by holding

"Switch" sign

OPERATION

- 1.Touch the sensor button to turn ON the light.Tap-tap to change the light temperture from 3000K, 4000K to 6000K.
- 2.Touch and hold the Light on sensor button to dim the light. Release the botton when the light reaches the desired brightness setting.
- 3.Touch the sensor button to turn OFF the light.
The mirrors are equipped with a memory feature to preserve the previous brightness setting.

***Suggestion:** Turn off the mirror power supply if you don't use it for a long time.

WARNINGS:

- 1. Please do not use if you found the mirror have been broken.*
- 2. Never put any sharp or heavy material on the mirror surface, otherwise the glass mirror will be broken and body injury accidents may occur .*
- 3. Turn off the power switch in storm lightning weather to avoid electric parts damage.*

Use and Maintenance:**CAUTION:**

Mirror and mirror's body are constructed of mirrored glass and aluminum. Use a damp cloth to clean your mirrors. Do not use any abrasive material as it may damage the surface and finish of the mirror. A mild detergent may be used to clean the surfaces of the mirror. Spray the cloth, not the mirrors or surrounding surfaces.
