

VanZyverden's
TULIP SPECIE NATURALIZING BLEND

Tulips are the indispensable blooms of the spring garden, as they bring it to life! They are unique in the range of size, shape, and bold color found in almost every color spectrum, that only tulips provide. Tulips are suitable for a wide range of plantings, are excellent in the rock garden, in formal beds, as elegant cut flowers, and for containers. They can be used in nearly any garden design scheme. Flowers are upward facing, with linear to lance-shaped green leaves on the stem. Tulip descriptions can become quite technical, as they are grouped into 15 different divisions, describing the petals, stamens, and leaves in detail. Plant several different varieties of tulips throughout the garden to extend the blooming time.

Low maintenance

Good for containers

Fragrant

About This Variety: Most gardeners are familiar with the hybrid tulip types, yet for longer blooms try these Specie tulips. These are the predecessor of modern tulips. The Specie tulips naturalize more easily which can be kind of rare with regular garden tulips. Varieties included in the mixture are complimentary in color, blooming time and height.

Growing Instructions: To ensure optimal results, allow adequate space and sunlight, plant at the appropriate depth, and feed with a well balanced fertilizer. Remove the flowers as soon as they fade, but allow the leaves to yellow before removing. Best planted in late fall. Some gardeners treat tulips as annuals. For an informal look, plant in groups in natural swathes or bouquets.

Care Tip: In USDA zones 8-10, refrigerate the bulbs for no less than eight weeks. In the garden, plant them before frost, but not as early as in the northern part of the country. Planting them in a lightly shaded area will keep them cool and prolong blooming.

Exposure: Full sun to partial shade

Height: Grows 6-8" tall

Spacing: Plant 4-6" apart, 2-4" deep

USDA Zones: Hardy in USDA zones 3-7

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
