

USE & CARE

1. Care should be taken when placing hot items directly on the table. Use a trivet or surface pad when serving heated dishes.
2. Liquids should be immediately blotted with a damp cloth. Do not use surface cleaners that could remove the finish.
3. Hardware may loosen over time; periodically check to make sure all connections are tight.
4. Blot spills immediately with a clean, colorfast towel. Spot clean with a damp cloth or sponge, gently blotting to remove excess water, then air dry. For stains that can't be removed as such, professional cleaning is advised. We recommend periodically fluffing cushions and vacuuming crevices. To prevent fading, keep fabric out of direct sunlight.
