Estimated assembly time: 30 minutes to 1 hour

Tools Required for Assembly (not included): Phillips screwdriver, flathead screwdriver, wire strippers, electrical tape, ladder, safety glasses.

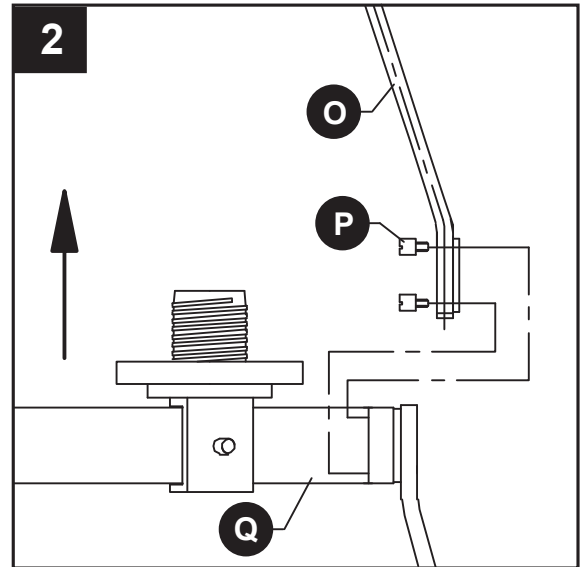

ASSEMBLY INSTRUCTIONS

1. Bring arm (O) to fixture top (V) and secure with lock washers (S) and small hex nuts (R).

Note: The electrical cable will need to get pulled through the individual parts as they are installed on this and later steps.

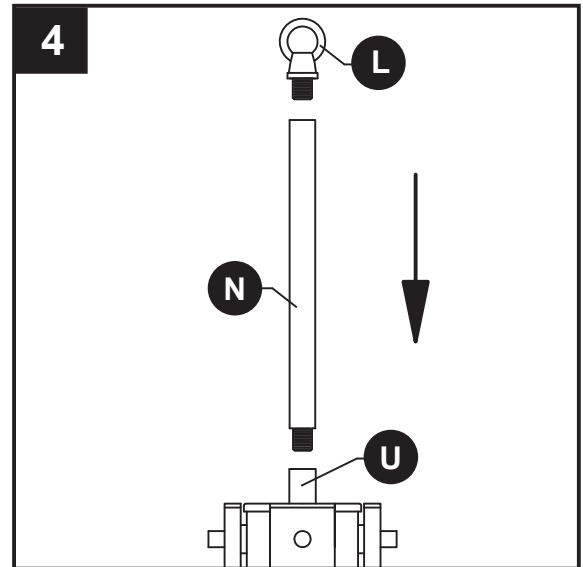

3. Lower coupling cover (V) over coupling (F) and secure with pipe coupling (U).

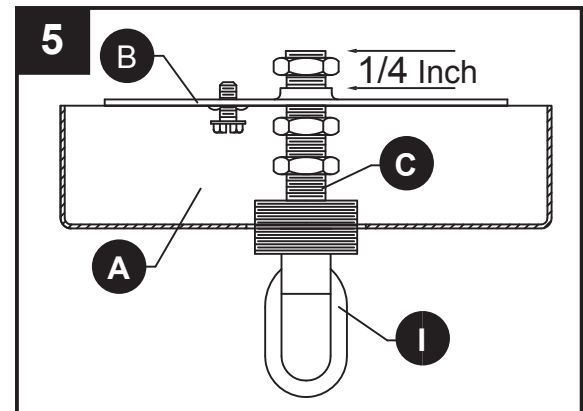

ASSEMBLY INSTRUCTIONS

4. Screw fixture loop (L) onto threaded pipe (N) before screwing threaded pipe onto pipe coupling (U).

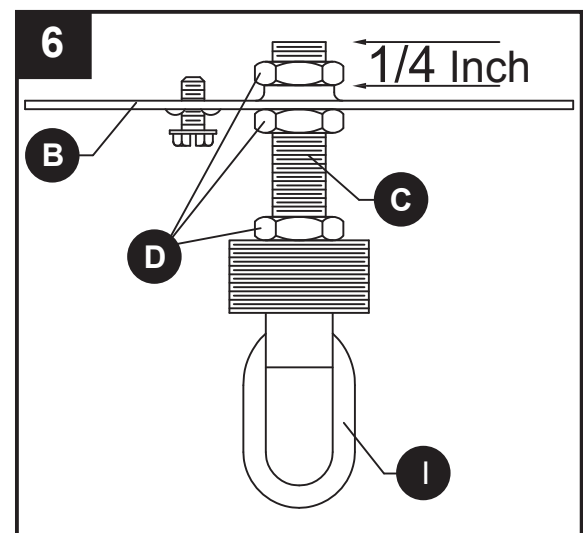

5. Position threaded nipple (C) in mounting bracket (B) so that, when mounted:

- The threaded nipple (C) will protrude a minimum of $\frac{1}{4}$ inch beyond the raised center portion of the bracket (B).
- The threaded nipple (C) height should be positioned so that $\frac{1}{2}$ the exterior threads of the screw collar loop (I) will extend past the canopy (A), when it is mounted.

6. Once the proper position of the threaded nipple (C) and bracket (B) has been determined, secure with 3 hex nuts (D) as follows:

- Screw 1st hex nut (D) onto the threaded nipple (C) and tighten against the raised portion of the bracket (B).
- Screw 2nd hex nut (D) onto the threaded nipple (C) and tighten against the flat portion of the mounting bracket (B).
- Screw the third hex nut (D) onto threaded nipple (C) and tighten against the screw collar loop (I).

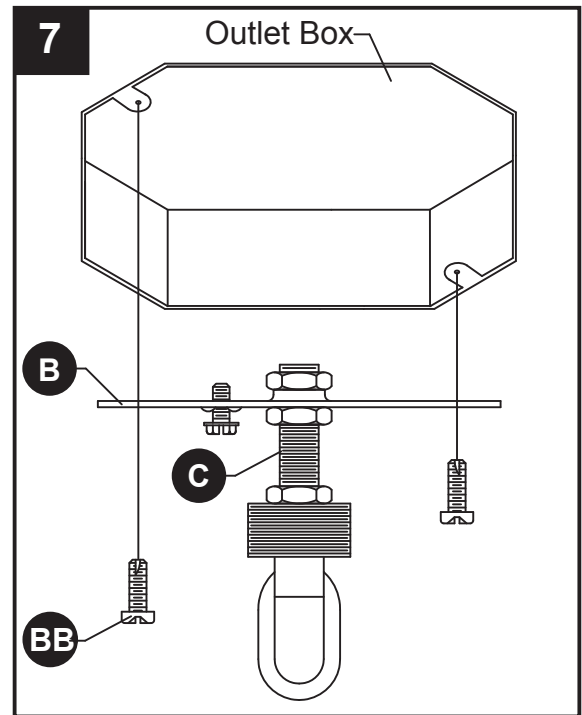

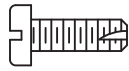

ASSEMBLY INSTRUCTIONS
