Vantage Panel Arch Top
Installation Instructions

Step 1

Attach the Panel Arch to the shutter by using the clips provided. Align the shutter and the Panel Arch on a flat surface. Be sure the sides are also aligned. Once the clip is pushed into place it cannot be moved around. Join them together by pushing each clip on as far as it will go. Use 2 clips per Panel Arch. See Figure 1 for clip placement.

Step 2

Fasten the shutter and Panel Arch Top assembly to the wall. Use the instructions supplied with the shutters for proper installation techniques. Figure 2 shows the proper location for a Presslok or screw (depending on how the shutter is installed).
