INTRODUCTION

Thank you for purchasing the PureRelief XL Back & Neck Heating Pad from Pure Enrichment. We designed this full-coverage heating pad to provide soothing heat therapy to the entire neck, shoulder, and back area.

USING PURERELIEF XL

Attach the Pad Connector to the Control Connector. Push both parts together securely to ensure a tight fit.

NOTE: The Control Connector must be connected to the Pad Connector before plugging the unit into an electrical outlet.

After connecting the Pad Connector to the Control Connector, plug the unit into a 120V AC electrical outlet.

To turn PureRelief XL on, press the power button. Select the desired heat setting by continuing to press the power button until the heat indicator light is the color of your desired heat setting:

Green=Warm

Orange=Medium

Yellow=Low

Red=High

To turn PureRelief XL off, press the power button one more time.

NOTE: The “high” indicator light will blink red when an error occurs. If this happens, unplug PureRelief XL. Check the physical condition of the cord, the wall outlet, and the connection between the Control Connector and the Pad Connector. If blinking persists after you confirm proper connection, contact Pure Enrichment at help@pureenrichment.com

USING PURERELIEF XL (Cont'd)

NOTE: If the unit does not turn on when you press the power button, make sure the Control Connector is securely plugged into the Pad Connector.

To turn PureRelief XL off, scroll through all the heat settings until the heat indicator light turns off.

CUSTOMIZING THE FIT

PureRelief XL is made with 2 built-in belt loops and includes a removable elastic belt. For a snug fit, insert the belt into the loops, position the heating pad as you normally would around your neck and back, then wrap the belt around your waist and secure with the velcro closure.

AUTO-OFF FEATURE

To conserve energy and prevent skin burns caused by excessive use, PureRelief includes an auto-off feature. The unit will turn off automatically after two hours of continuous use. The red auto-off light will blink when this feature is activated.

NOTE: After a power outage, PureRelief XL automatically resets the timer on the auto-off feature.

USING MOIST HEAT THERAPY

Physical therapists often recommend moist heat therapy to reduce muscle spasms, improve joint stiffness, and relax tense muscles. To use moist heat therapy with PureRelief XL, fill a spray bottle with water and lightly mist the entire surface of the pad. Take care to protect your clothing and furniture when using a damp heating pad.

DANGER: DO NOT submerge PureRelief XL in water or place it under running water while it is plugged into an electrical outlet. Doing so can damage PureRelief and cause serious personal injury.

USING PURERELIEF XL (Cont'd)

NOTE: The Pad Connector and the Control Connector must be completely dry before establishing an electrical connection.

WASHING INSTRUCTIONS

To prolong the life of your heating pad, proper care and cleaning is essential. Follow these washing instructions to preserve the softness of the fabric and protect the electrical components:

1. Fill washer with warm water.
2. Add a minimum amount of all-purpose detergent, agitate to dissolve, measure heating pad before washing.
3. Add heating pad and soak five minutes.
4. Agitate two minutes. Spin. Fill for cool rinse, agitate one minute then spin.
5. Dry in an automatic dryer on high heat for five minutes only or line dry.
6. Remove damp heating pad from dryer.
7. Block to original size and drape to finish drying.
8. Do not iron your heating pad.

NOTE: Make sure the Pad Connector is completely dry before plugging the heating pad into an electrical outlet.
