

## Product Care Instructions

After a few seasons on the porch, your furnishings may start to show their age with rust marks, mildew, or stains. These general care tips will ensure that your chairs, tables, and cushions look beautiful for years to come.

Combine 1/4 cup mild dishwashing liquid, such as Ivory, and 1 gallon warm water. Use a sponge or a soft-bristle brush to scrub the furniture's surface thoroughly. Rinse, and then pat dry with a lint-free cloth.

Scrub or sand lightly to remove mold, depending on the material. Wear gloves, and discard used supplies to avoid spreading spores.

Cover items when they're not in use, or store them indoors. Remove the foot caps on chairs and tables, and keep furniture upright to allow accumulated water to drain.

*NOTE: Do not power-wash or use chlorine bleach, pine oil, or abrasive cleansers unless directed. Test new solutions on a hidden area.*
