I Installing Your Countertop Refrigerator

Unpacking Your Countertop Refrigerator

- Remove all packaging material. This includes the foam base and all adhesive tapeholding the Countertop Refrigerator accessories inside and outside.
- Inspect and remove any remaining packing, tape or printed materials before powering on the Countertop Refrigerator.

Leveling Your Countertop Refrigerator

- Your Countertop Refrigerator has two leveling legs which are located in the front corners. After properly placing your Countertop Refrigerator in its final position, you can level your Countertop Refrigerator.
- Leveling legs can be adjusted by turning them clockwise to lower your Countertop Refrigerator or by turning them counterclockwise to raise your Countertop Refrigerator. The Countertop Refrigerator door will close more easily when the two front leveling legs are extended slightly.

Proper Air Circulation

- To ensure that your Countertop Refrigerator works at the maximum efficiency it
 was designed for, you should install it in a location where there is proper air
 circulation and electrical connections.
- The following are recommended clearances around the Countertop Refrigerator:

· Do not overfill your Countertop Refrigerator for proper cooling.

Note: If your Countertop Refrigerator has been tilted for any reason, wait <u>4 hours</u> before plugging it in.

Drip Tray

• Ensure the drip tray in the rear of the unit is in the proper position.

WARNING: ELECTRICAL REQUIREMENT - SHOCK HAZARD

Electrical Requirement

- Make sure there is a suitable power outlet (115 volts, 15 amps outlet) with proper grounding to power the Countertop Refrigerator.
- Avoid the use of three prong adapters or cutting off the third grounding prong in order to accommodate a two prong outlet. This is a dangerous practice since it provides no effective grounding for the Countertop Refrigerator and may result in shock hazard.

Installation Limitations

- Do not install your Countertop Refrigerator in any location not properly insulated or heated (e.g., garage etc.). Your Countertop Refrigerator was not designed to operate inambient temperature settings below 55° Fahrenheit.
- Select a suitable location for the Countertop Refrigerator on a hard even surface away from direct sunlight or heat source (e.g., radiators, baseboard heaters, cooking appliances, etc.). Any floor unevenness should be corrected with the leveling legs located on the front and rear bottom corners of the Countertop Refrigerator.
- Your Countertop Refrigerator is designed for freestanding installation only. It is not designed for built-in application. Note: This unit is for indoor use only.

Use of Extension Cord

 Avoid the use of an extension cord because of potential safety hazards under certain conditions. If it is necessary to use an extension cord, use only a 3-wire extension cord that has a 3-blade grounding plug and a 3-slot outlet that will accept the plug. The marked rating of the extension cord must be equal to or greater than the electrical rating of the appliance.

Shelving (See Fig. #2)

2.

- To remove or replace a full-width slide-out shelf:
 - Gently tilt the shelf up and slide forward until the shelf has been completely removed.

To replace the shelf, gently slide the shelf back.

Normal Operating Sounds You May Hear

- Boiling water, gurgling sounds or slight vibrations that are the result of the refrigerant circulating through the cooling coils.
- Compressor makes operational sounds when cycling on and off.

| Proper Countertop Refrigerator **Care & Cleaning**

Cleaning and Maintenance

Warning:

 To avoid electric shock, always unplug your Countertop Refrigerator before cleaning. Ignoring this warning may result in death or njury

Caution:

 Before using cleaning products, always read and follow manufacturer's instructions and warnings to avoid personal injury or product damage.

General:

- Prepare a cleaning solution of 3-4 tablespoons of baking soda mixed with warm water. Use sponge or soft cloth, dampened with the cleaning solution, to wipe down your Countertop Refrigerator
- · Rinse with clean warm water and dry with a soft cloth.
- Do not use harsh chemicals, abrasives, ammonia, chlorine bleach, concentrated detergents, solvents or metal scouring pads. Some of these chemicals may dissolve, damage and/or discolor your Countertop Refrigerator

Door Gaskets:

- * Clean door gaskets every three months according to general instructions. Gaskets must be kept clean and pliable to assure a proper seal.
- Petroleum jelly applied lightly on the hinge side of gaskets will keep the gasket pliable and ensure a good seal.

I Proper Countertop Refrigerator Care & Cleaning

Defrosting Your Countertop Refrigerator

Your Countertop Refrigerator is designed with a manual defrost system. The Countertop Refrigerator surfaces will defrost, when the unit is unplug. Water from the unit is disposed of automatically, by means of being channeled onto a drip tray located on the compressor. Heat transfer from the compressor causes this water to evaporate.

Power Interruptions

Occasionally there may be power interruptions due to thunderstorms or other causes. Remove the power cord from AC outlet when a power outage occurs. When power has been restored, replug power cord to AC outlet.

Vacation and Moving Care

For long vacations or absences, empty contents from Countertop Refrigerator, unplug the unit and clean the Countertop Refrigerator and door gaskets according to "General cleaning" section. Prop doors open, so air can circulate inside. When moving, always move the Countertop Refrigerator vertically. Do not move with the unit lying down. Possible damage to the sealed system could occur

I Temperature Settings Adjustable

| Temperature Settings | Temperature Ranges |
|----------------------|--------------------|
| 1 | 57°F |
| 2 | 54°F |
| 3 | 51°F |
| 4 | 48°F |
| 5 | 45°F |
| 6 | 41°F |
| 7 | 37°F |

I Warranty

We offers a limited 1-year warranty ("warranty period") on all of our products purchased new and unused from us with an original proof of purchase and where a defect has arisen, wholly or substantially, as a result of faulty manufacture, parts, or workmanship during the warranty period. The warranty does not apply where damage is caused by other factors, including without limitation:

- (a) normal wear and tear;
- (b) abuse, mishandling, accident, or failure to follow operating instructions;
- (c) exposure to liquid or infiltration of foreign particles;
- (d) servicing or modifications of the product other than by our company;

Our warranty covers all costs related to restoring the proven defective product through repair or

replacement of any defective part and necessary labor so that it conforms to its original specifications. A replacement product may be provided instead of repairing a defective product. Our sole obligation under this warranty is limited to such repair or replacement. A receipt indicating the purchase date is required for any claim, so please keep all receipts in a safe place. Although greatly appreciated, the product registration is not required to activate any warranty, and product registration does not eliminate the need for the original proof of purchase. The warranty will be voided if repairs are performed by a non-authorized third party and/or if spare parts other than those provided by the Company are used.

You may also arrange for service after the warranty expires, at an additional cost. These are our general terms for warranty service, but we always urge our customers to reach out to us with any issue, regardless of warranty terms. If you have an issue with our products, please contact us (<code>support@homyd.com</code>), and we will do our best to resolve it for you.
