

**Water Sensor Starter Kit**  
Quick Start Guide

## Component List

### In the Box

---

Gro™ Hub

Gro™ Water Sensor

AAA Batteries x 2

---

### What you will need

- iOS or Android Device
- Internet Service and Wi-Fi Router

## Step 1

### Plug in Gro™ Hub

Gro™ Hub must be placed indoors within your Wi-Fi range to pair. This is typically within 150 feet but will vary depending on your network. Gro™ Hub cannot be used outdoors.

## Step 2

### Install batteries

Unscrew the bottom portion of the sensor and pull the battery terminal cap off. Look inside the Gro™ Water Sensor for the positive and negative battery positions. Then insert the AAA batteries into the housing, replace the battery cap, and screw the bottom portion back onto the sensor.

### Step 3

## Place the Gro™ Water Sensor near your favorite plant

Your Gro™ Water Sensor can be placed in the soil near plants. Just insert the Sensing Probes completely into the soil. This can be in pots, containers, raised bed gardens, or your garden. The Gro™ Water Sensor has a range of up

to 300 feet from the Gro™ Hub. However, this distance can vary depending on obstructions between the Gro™ Water Sensor and Gro™ Hub, such as walls or other sources of electrical interference.

## Step 4

### Get the Gro™ Connect app

The Gro™ Connect app can be downloaded from the Apple Store or Google Play.

The app will walk you through connecting the Gro™ Hub and Water Sensor to your Wi-Fi network.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

#### **UNAPPROVED MODIFICATIONS**

This device has been designed to comply with the rules of the Federal Communications Commission. Changes or modifications not expressly approved could void the user's authority to operate the equipment.

#### **GRO™ HUB**

The antenna(s) used for this transmitter must be installed so as to provide a separation distance of 20cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.

#### **GRO™ WATER SENSOR**

The antenna (s) used for this transmitter must not be co-located or operating in conjunction.

## Welcome to Gro™.

The Gro™ ecosystem is a new way for you to manage all things that grow. Gro™ smart devices replace guesswork with data by using sensors, controllers, and pulling weather analytics. Gro™ also offers you more ways to save time and reduce waste with precision watering kits and nutrient delivery systems. All this is pulled together in a family of beautifully simple apps allowing you to control from anywhere.

Gro™ — bringing you more joy, fewer chores.
