ELEPHANT EARS MOJITO

Colocasias are exotic plants known in the western world by three common names: taro, kalo, and the descriptive anatomical name, elephant ear. Elephant Ear bulbs are among the most eye catching of all bulbs. Not only are they one of the largest flowering bulbs, but they are also very versatile and can grow with little sunlight to full shade. Beautiful on their own or planted as a back drop for your favorite blooms, they provide a bold tropical effect in any garden. Once established, they require little to no attention.

*Exotic form and color
and showy foliage*

*No two variegated leaves
ever look quite the same*

*New and unique
tropical variety*

About This Variety: The proper and complete botanical name of this variety is *Colocasia esculenta 'Mojito'*. This is a very unique and newer variety, named after the popular Cuban drink. Its green leaves are set off by dark spots and purple stems. The speckles and streaks vary from leaf to leaf, so no two leaves are ever quite the same. A real thriller in the garden, adding surprise and interest. The leaves are 8-14 inches in length and width.

Growing Instructions: Plant outdoors only after soil and night temperatures have warmed up above 60°F.

Care Tip: They love water so much that you can even plant them in ponds. Never let the soil dry out.

Exposure: Full sun to partial shade

Height: Grows 36" tall

Spacing: Plant 3-4' apart, 1" deep

Hardy in: USDA zones 11-12

Guaranteed to grow 1 year from purchase
if directions are followed. Any concerns related
to quality and/or counts feel free to contact us.
