

1 ¼ in. (1.25") Louver Faux Wood Shutter - INSIDE MOUNT

① Measure Your Window and Select Proper Size Shutter

Measure the **INSIDE WIDTH** of the window opening in 3 places: Top, Middle and Bottom. Record the **WIDEST** measurement.

Measure the **INSIDE LENGTH(HEIGHT)** of the window opening in 3 places; Left, Middle and Right. Record the **LONGEST** measurement.

Using the chart below, select the shutter size that best matches your recorded measurements.

② Choose Your Shutter Style/Configuration

Single Hung

A single shutter length covers the entire height of the window opening.

Café

The height of the shutter is less than the full height of the window opening.

***NOTE:** At least 1" of flat surface area inside the recess of the window opening is recommended in order to properly secure an inside mount frame.

For flush-mounted reference, the shutter frames and strips thickness are the same as 16mm. (disregard the louver thickness)

Length(Height) measurements related to the adjustments (shorten the shutter). Trim limits are ¾ in.(0.75") on the TOP and 1 ½ in.(1.5") on the BOTTOM.

1 ¼ in. (1.25") Louver Faux Wood Shutter - OUTSIDE MOUNT

① Measure Your Window and Select Proper Size Shutter

Measure the **WIDTH** and **LENGTH(HEIGHT)** from point to point on your molding or wall where the frame will be hung (a minimum of ¾ in. (0.75") **FLAT SPACE** is needed at the point on your molding or wall where the frame will be hung.)

If you have a window sill, measure from the top of the sill to the point on your molding or wall where the frame will be hung.

Using the chart below, select the shutter size that best matches your recorded measurements.

***NOTE:** 1" flat space on the wall or window frame is recommended in order to properly secure the shutter. Above width ranges are based on the suggestion.

For other outside-mounted reference, each hanging strip is 1 ¼ inch wide, each stile (shutter panel frame) is 1 ¼ inch wide.

When install an shutter onto a smaller window opening than suggested, the overlap of the window would cause the shutter louvers not operate.

Length(Height) measurements related to the adjustments (shorten the shutter). Trim limits are ¾ in.(0.75") on the TOP and 1 ½ in.(1.5") on the BOTTOM.
