1. MOUNT

1. Mount CEILING BRACKET securely to ceiling beam (do not mount on drywall).

2. Pull out and twist SPRING LOADED SAFETY PIN (fig.1a) and loosen LOCKING SCREW to clear rail.

3. Slide ROBOREEL onto CEILING BRACKET (Fig. 1b).

4. Twist and release SPRING LOADED SAFETY PIN and adjust ROBOREEL until pins lock in place.

5. Tighten LOCKING SCREW (fig.1b). Connect POWER ENTRY CABLE to outlet.

fig.1a

fig.1b
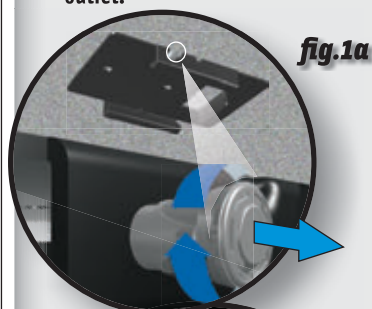

2. SET RESTING HEIGHT AND DOCKING DISTANCE

ROBOREEL CAN BE EASILY ADJUSTED TO SLOW DOWN AT DESIRED DISTANCE TO PREVENT INJURY OR DAMAGE.

1. To Customize Resting Height of Receptacle Ball
   a) Extract Cord to Desired Height.
   b) Attach BALL STOPPER (5) to cord at ROBOREEL's opening. (screws included)

2. To Customize the Docking Distance
   NOTE: The cord reel can be easily adjusted to slow down at a desired distance (docking distance) to prevent dangerous whipping action.

   a) Pull down the RECEPTACLE BALL (2) until it touches the floor or to desired location.

   b) Press and <u>hold</u> POWER/RETRACT button (1) until LED lights turn on. Release the button.

   c) Press and <u>HOLD</u> same button a SECOND time until LED lights blink TWICE. Release the button.

   Programming is now complete.
