

VanZyverden's
DAFFODIL KITCHEN SINK MIXTURE

Daffodils (botanically called *Narcissus*) are long term perennials and make for great companions to not only other bulbs, but also annuals, perennials and all sorts of shrubs. They soften hardscapes, accent most any garden and are an inexpensive solution to adding color to your garden on nearly any budget. They are relatively pest free and deer will not eat them. Daffodil classifications become quite technical, as they are divided into 13 divisions according to their flower shape and heritage by the American Daffodil Society. They do well throughout most of the U.S., as long as there is a discernible winter. Daffodils are ideal for large plantings and naturalizing, making them an exceptional value item and providing years of carefree color.

*Deer resistant and
years of carefree color*

Best buy daffodil mixture

*Each mixture is
guaranteed to be unique.*

About This Variety: Van Zyverden handles hundreds of varieties of Narcissus (daffodils), so sometimes it is challenging to select which variations to include in a mixture such as this. Some varieties are standards, and others are extraordinary and unique. We gather overruns and produce a special all-in-one mixture from an untold number of varieties to create a potluck full of fun surprises. As each blend is guaranteed to be unique, buy several packs to plant in mass and create that dramatic, bold curb appeal.

Growing Instructions: In fall, plant the bulbs pointy end up, in deep, fertile, well draining soil in full sun to light shade. Bulbs do not like wet feet. Water during their growth period. Fertilization helps growth and natural increase by offsets. Daffodils can be left undisturbed to naturalize for years. If you cannot plant them immediately, store in a cool, air place.

Care Tip: When given ample sun light, water and proper nutrition, removing the flowers as soon as they finish blooming. Allow the leaves to brown before removing, they will return for years to come with little other effort.

Exposure: Full sun to partial shade

Height: Grows 10-24" tall

Spacing: Plant 8" apart, 6" deep

USDA Zones: Hardy in USDA zones 3-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
