STOP!

⚠ LEVEL AND SQUARE FLOOR FRAME ⚠

Before attaching floor decking, it is important to level and square the floor frame.
A level and square floor frame is required to correctly construct your shed.

STOP!

BEGIN

1 ⚠ See page 15 for the preferred floor leveling method.

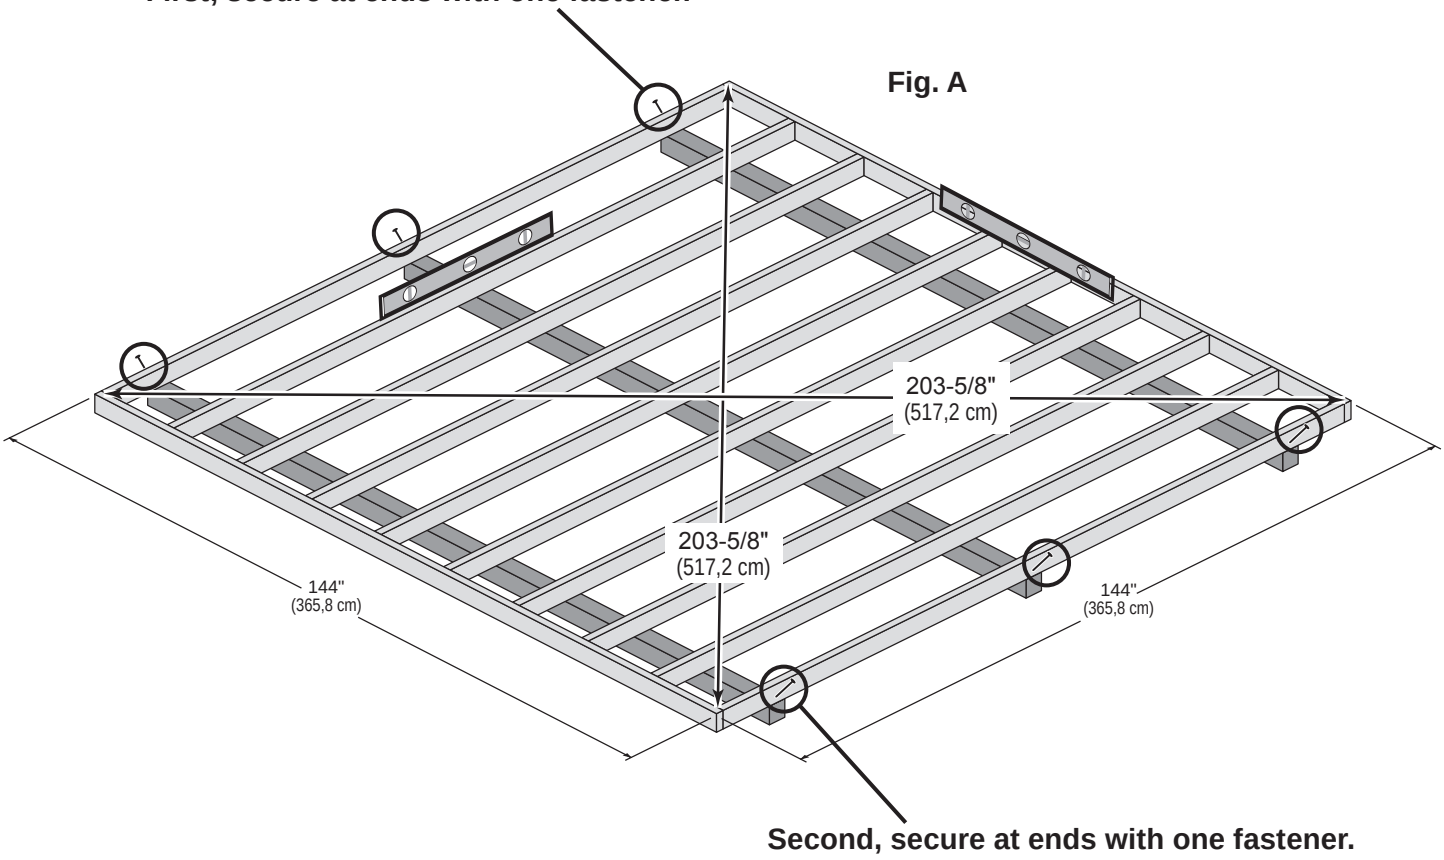
2 Use a level to ensure that the floor frame is level before installing floor panels.

3 Check for frame squareness by measuring diagonally across corners.
If the measurements are the same, the frame is square.
The diagonal measurement will be approximately 203-5/8" (517,2 cm).

4 When the frame is level and square, secure one side of frame to the 4x4 runners with (1) fastener at the end of each runner. Move to the opposite end of the frame. Secure the frame to 4x4 runners with one fastener at ends of each runner making sure the frame remains square **(Fig. A)**.

First, secure at ends with one fastener.

Fig. A



Second, secure at ends with one fastener.

FINISH

Your floor frame is secured to 4x4 runners and is now square.

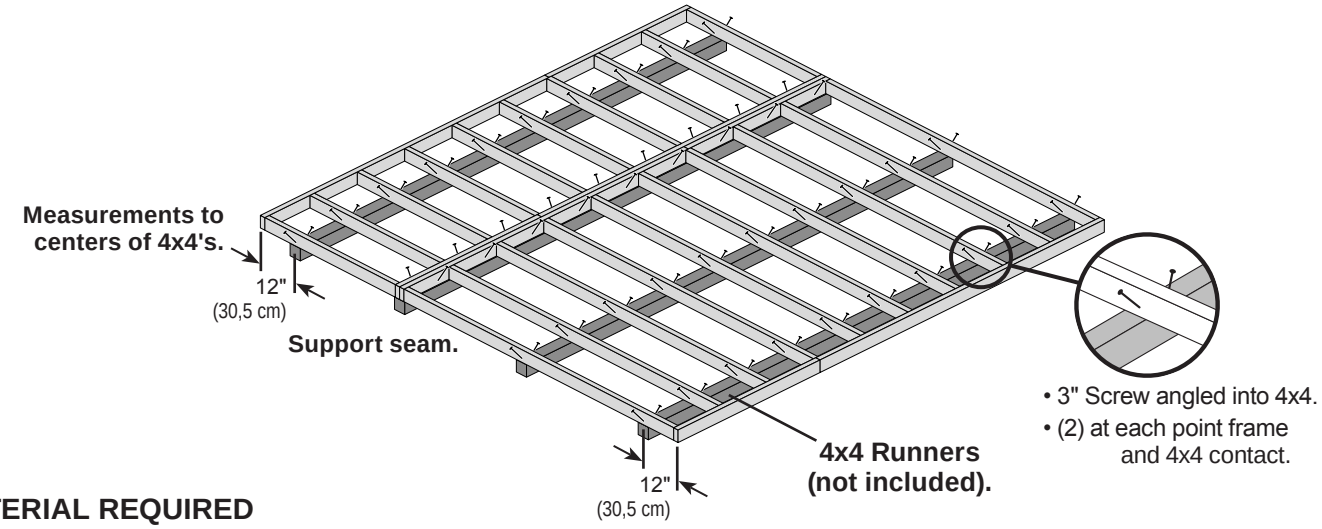
FLOOR LEVELING OPTIONS

There are multiple ways to level your floor frame. Our recommended leveling method is shown below. Leveling materials are not included in this kit.

PREFERRED METHOD - 4x4 TREATED RUNNERS



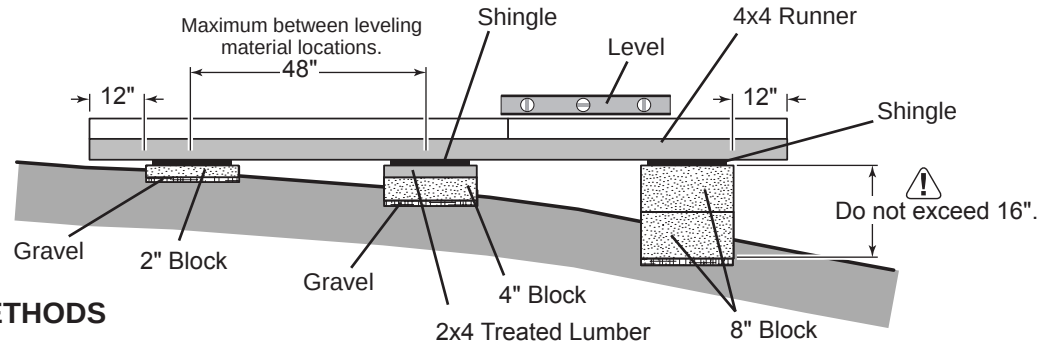
MATERIAL REQUIRED

☐ **x4 4 x 4 x 12' (10,2 x 10,2 x 365,8 cm) Treated Lumber**

☐ **Fasteners for Frame to 4x4.**
(3" Screws shown as one option.) Minimum (80) 3" screws / exterior grade.

⚠ **Use only wood treated for ground contact and fasteners approved for use with treated wood.**

⚠ **Always support frame seams.**



LEVELING METHODS

- Level under 4x4 runners only.
- Locate leveling material 12" from ends of runners and no more than 48" apart.
- Asphalt shingles should be used between 4x4 runners and blocks or treated lumber. Never use shingles in direct contact with ground.
- For best results and aiding in water drainage use gravel under each concrete block.

LEVELING MATERIALS

☐ Gravel

☐ Solid Masonry Blocks in 1", 2", 4" or 8" thickness

☐ 2x4 Treated Lumber

☐ Asphalt Shingles

⚠ **Leveling higher than 16" not recommended.**

CONCRETE

- If you are building your shed on a concrete foundation see page 8.

FLOOR PANELS (if DIY floor kit(s) purchased)

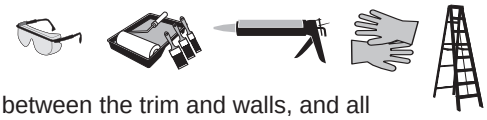
PAINT & CAULK
- NOT INCLUDED -



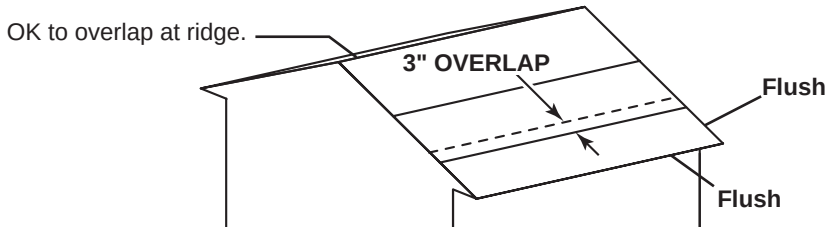
- Use acrylic latex caulk that is paintable. Caulk at all horizontal and vertical seams, between the trim and walls, and all around the door trim.

- Use a high quality exterior acrylic latex paint. When painting your building, there are a few key areas that can be easily overlooked that must be painted:
  - Bottom edge of all siding and trim
  - Inside of doors and all 4 edges

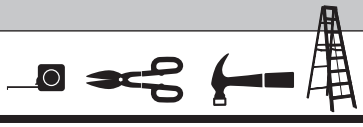
Note:
Prime all un-primed exterior wood before painting.
(Follow directions provided by manufacturer.)

ROOF FELT
- NOT INCLUDED -

- Install felt flush to all roof edges overlapping 3". Use minimal amount of roofing nails to hold in place.

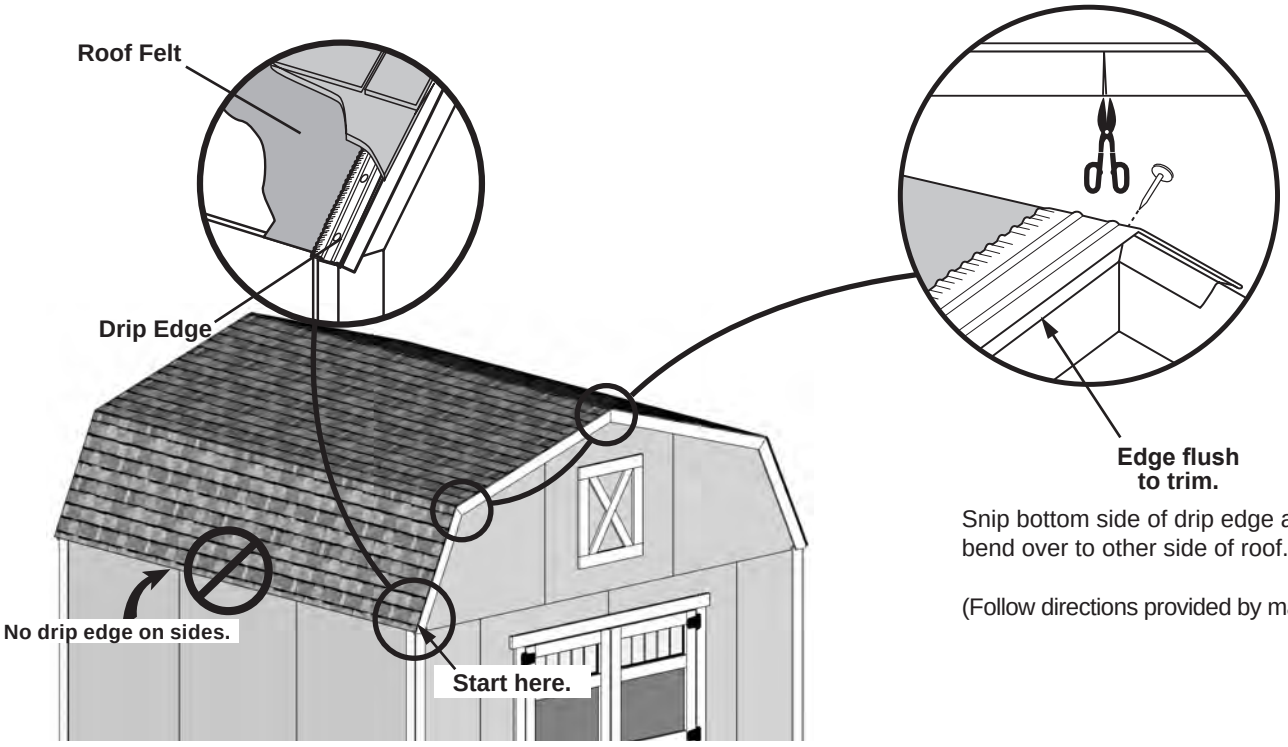


DRIP EDGE
- NOT INCLUDED -



⚠ Drip edge is only installed on the front and back sides of this shed.

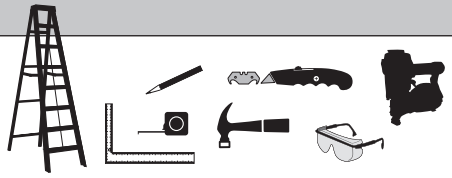
- Install over roof felt or over roof deck.
- Do not use nails on side of drip edge that hangs over side of building.
- Only nail top of drip edge as shown.



Snip bottom side of drip edge and bend over to other side of roof.

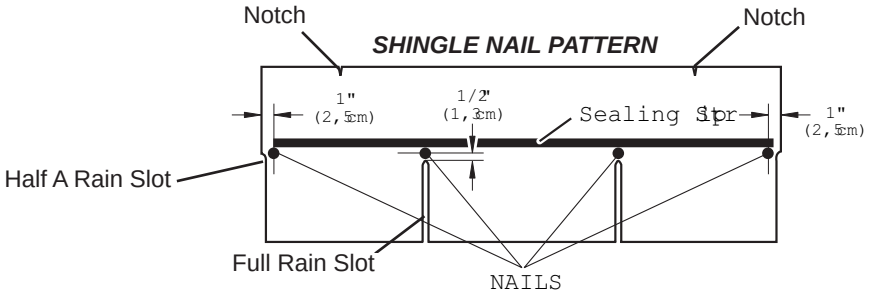
(Follow directions provided by manufacturer.)

SHINGLES
- NOT INCLUDED -



• Follow directions provided by manufacturer and these instructions.

⚠ Familiarize yourself with a 3-Tab Shingle.

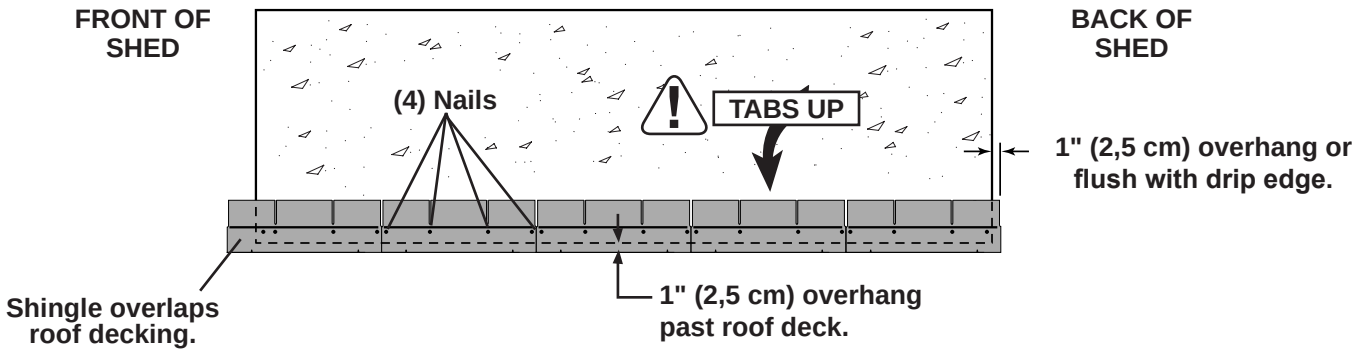


⚠ NEVER DRIVE FASTENERS INTO OR ABOVE SEALING STRIPS.

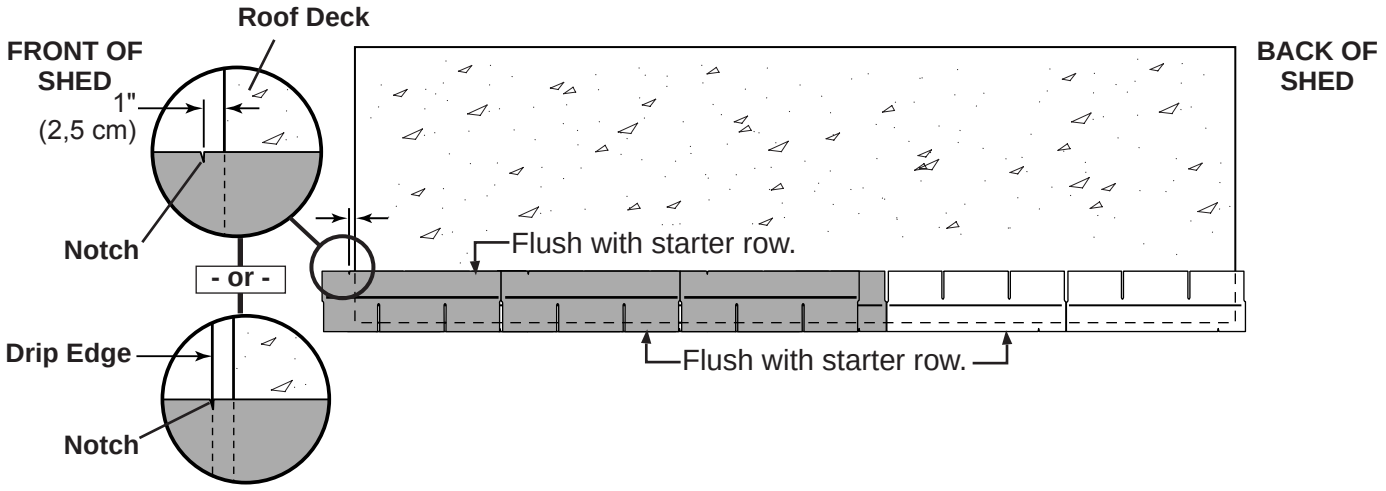
✓BEGIN

1 Install first starter row upside down and color up with a 1" overhang at back and bottom of roof panel. Use (4) nails per shingle. **Starter row must be straight and level all the way across with lower edge of roof deck.**

NOTE: If you have installed drip edge install shingles flush to drip edge.

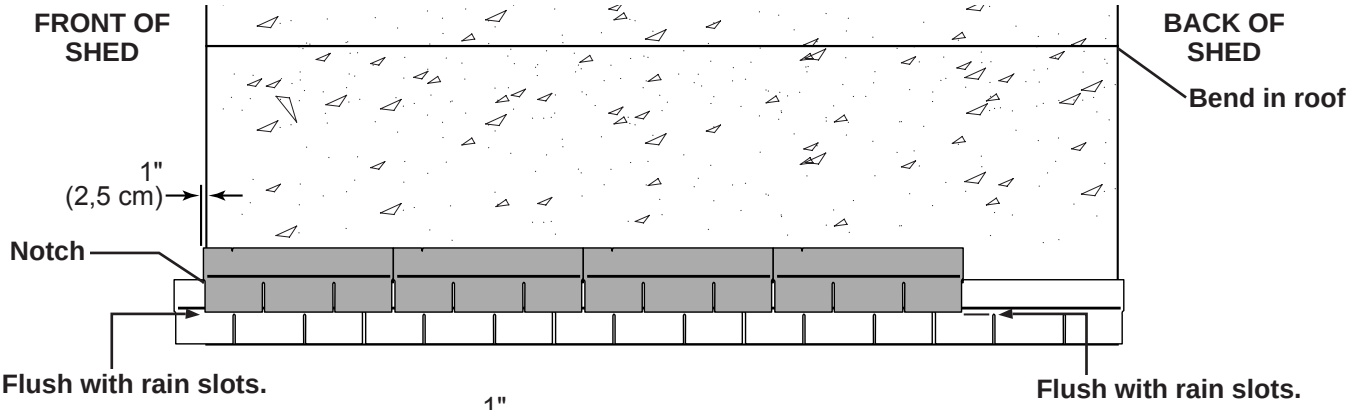


2 Beginning at front of shed, install first row of shingles with notch at 1" past roof edge or flush with drip edge.

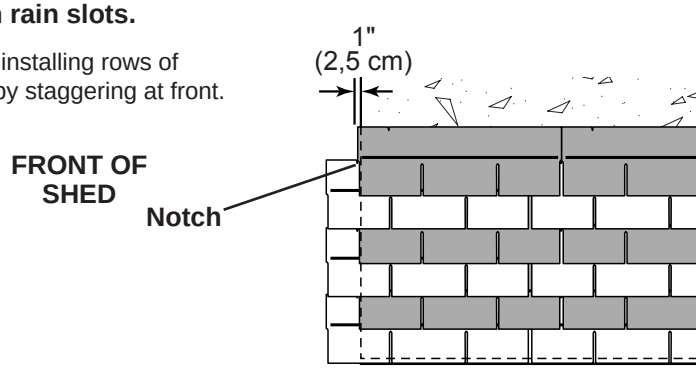


SHINGLES
continued...

3 Install second row of shingles flush at top of first row's rain slots. Ensure 1" overhang or flush to drip edge at front, stagger each row.



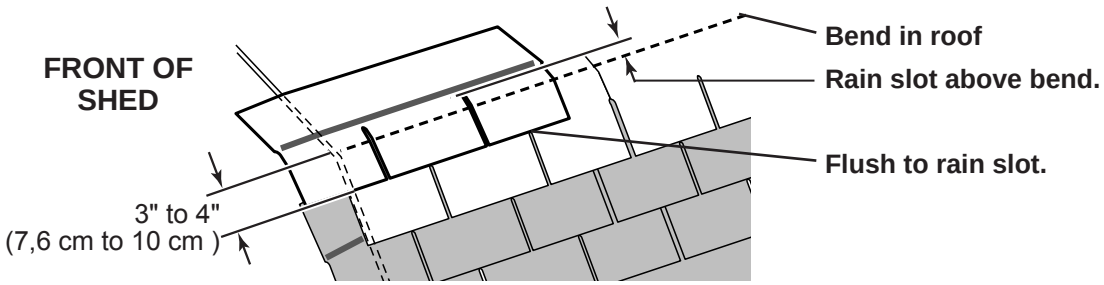
4 Continue installing rows of shingles by staggering at front.



5 The shingle over the bend in the roof will be nailed down. You will need 3" to 4" of this shingle to extend downward over the bend for nailing.

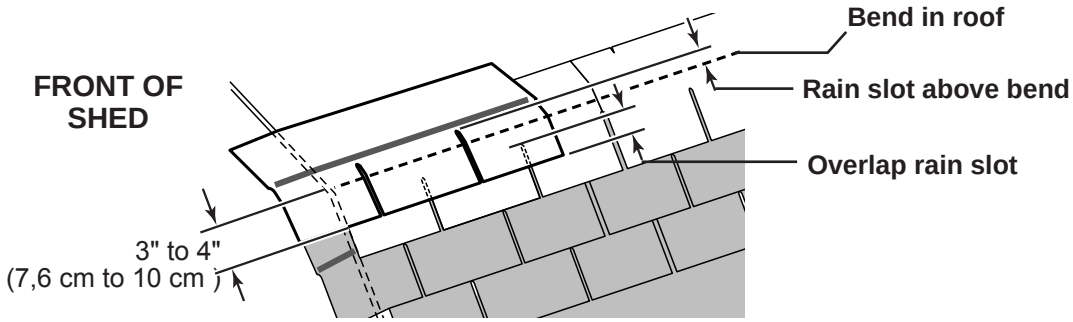
Look for either of the following:

- If the rain slot of the shingle installed over the bend is ABOVE the bend and 3" to 4" of it overhangs down over the bend, continue shingling up to the peak. You have enough to nail shingle down over the bend.



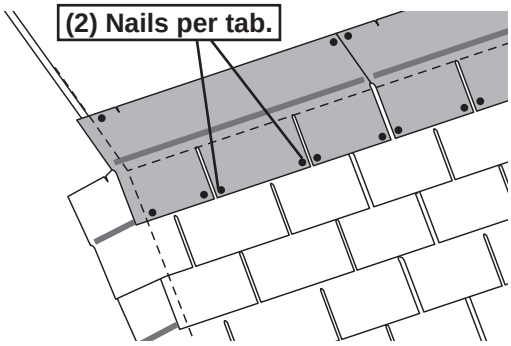
- OR -

- If the rain slot of the shingle installed over the bend is BELOW the bend, install the shingle over the bend and overlap the rain slot to get the 3" to 4" overlap.

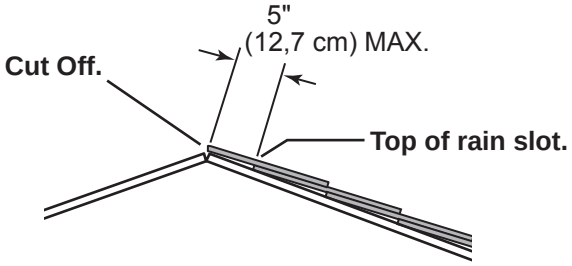


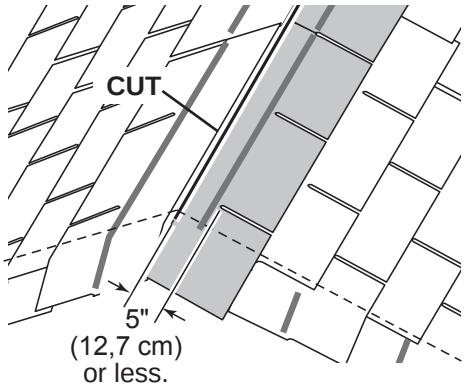
⚠ The shingle OVER the bend must be installed with a 3" to 4" overlap **AND** the rain slot above the bend.

6 After shingles are installed over bend, nail down overlap using two roofing nails per tab.



7 Continue installing rows of shingles to the peak. At the peak make sure there is a maximum of 5" or less to the rain slot, as shown below. If shingles overlap at ridge cut to peak with a utility knife.



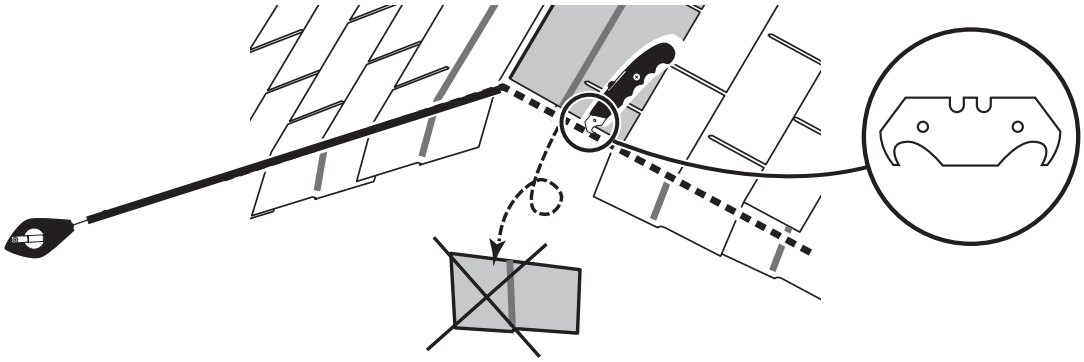


⚠ **• If more than 5" to rain slot you must install another row of shingles.**

8 Repeat steps 1 - 7 to shingle the opposite side of your roof. Trim shingles at ridge.

9 Once both sides are shingled you need to trim ends. Strike a chalk line 1" from edge.

10 Using your shingle hooked blade carefully cut shingles along chalk line.

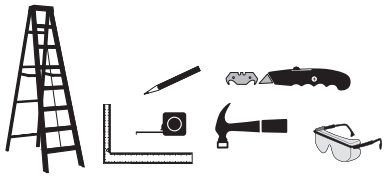


FINISH

You have finished shingling your roof. Proceed to capping the ridge.

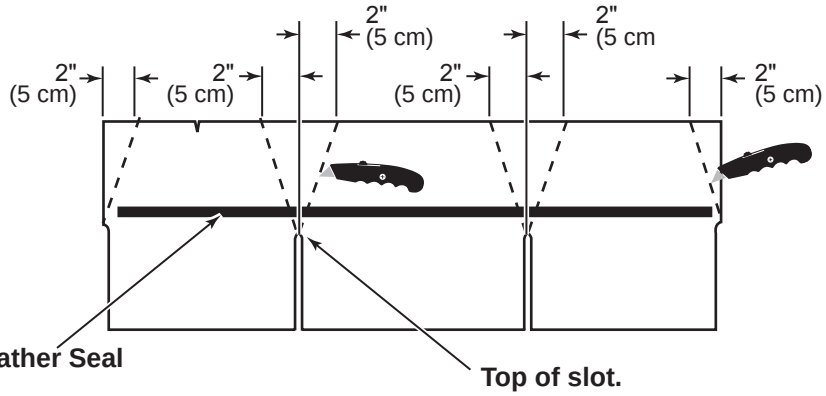
SHINGLES - RIDGE CAP

• You will finish off the top of the roof with a ridge cap made from shingles.



BEGIN

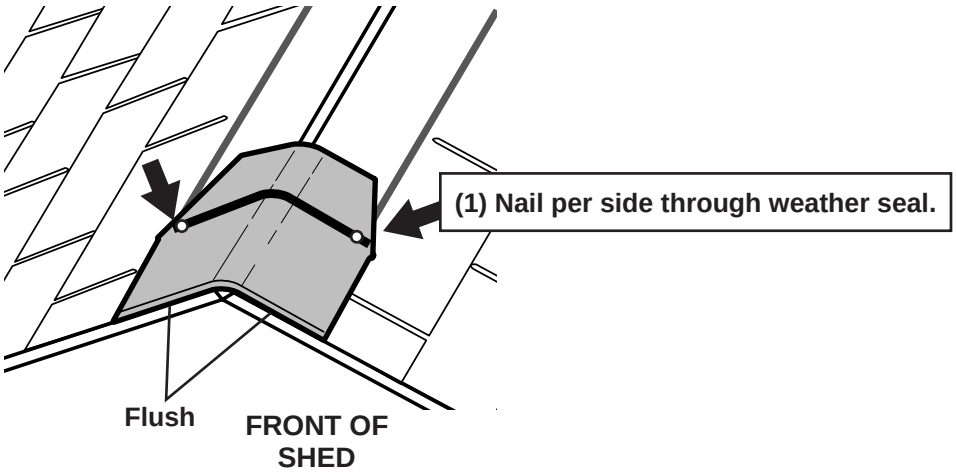
1 Cut shingles into THREE pieces. **Hint:** Use cut-off pieces first.



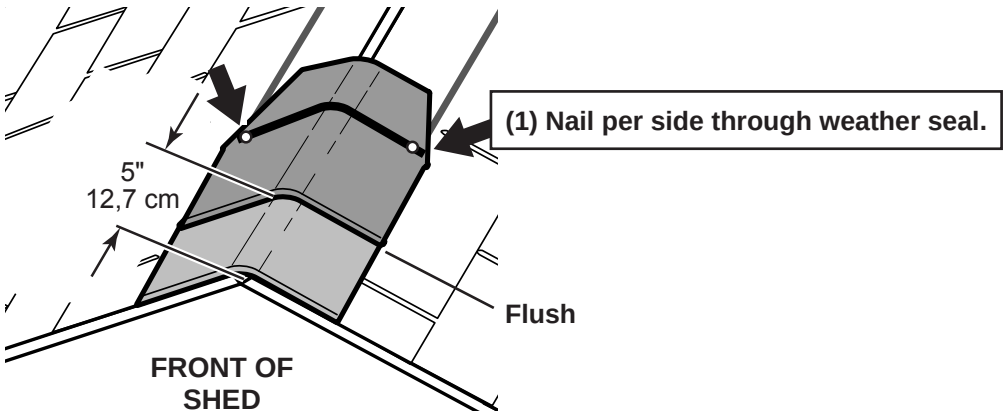
Score shingle, then snap-off angled cut.

Note: • You will need about 30 - 32 cut pieces.

2 Install first ridge cap flush to shingles at front, as shown.

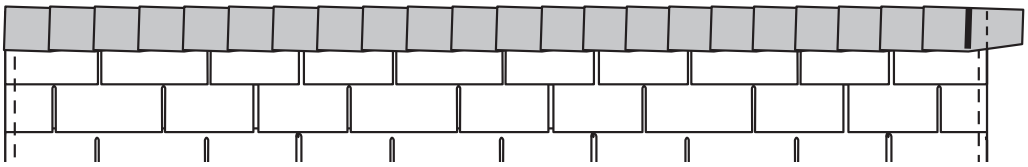


3 Install second ridge cap 5" back, as shown.

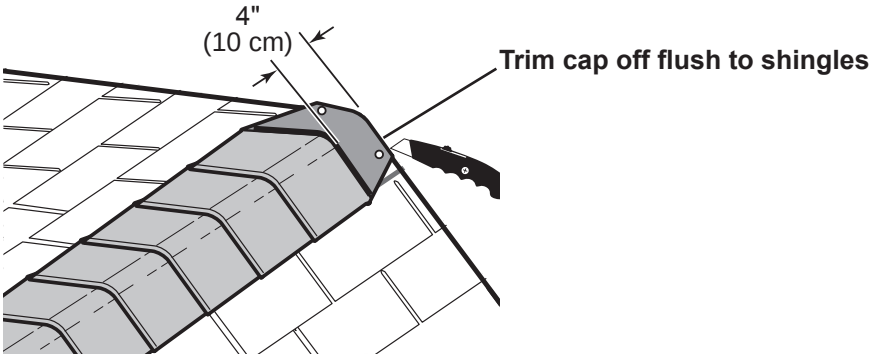


SHINGLES - RIDGE CAP
continued...

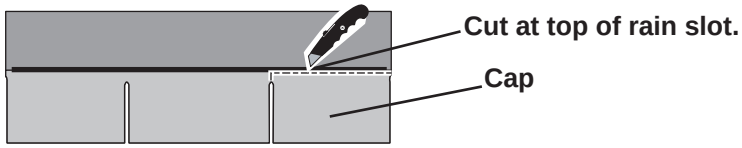
4 Continue installing ridge cap to back of roof.



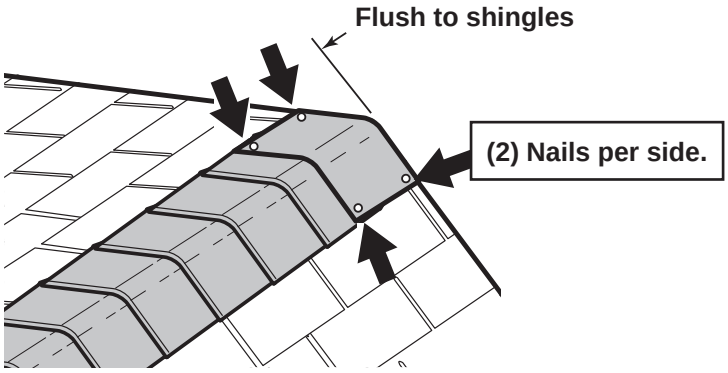
5 Make sure there is 4" between the shingle-color and edge of shingles.



6 When you have 4" minimum of shingle color cut one piece to cap your roof.



7 Install flush to shingles.



FINISH

You have finished your ridge cap.
