

Gas Leak Detector

Solución para detectar fugas de gas

Instructions

(Read All Instructions Carefully Before Using)

NOTE: Non-corrosive to metals and safe for polyethylene pipe and fittings.

1. Apply solution liberally over joint area. Check for leaks. Bubbles will form to indicate a leak .
2. If a leak is detected, turn off gas supply.
3. Loosen fitting or nut, then re-tighten connection, wrench tight.
Retest connection.
