

◆◆ NATURAL
STONE
VENEER

FACILITY

Natural Stone Veneer has created a new concept in Interior/Exterior stone design to enhance the look and value of your living space by cutting the stone to be a thin veneer that can be applied over any surface without jeopardizing

the integrity and beauty of the original design. Our products are defined by their durability, high density and overall quality which allow you to achieve superior results to your high-end design. With its full and diversified

range of products and services, Natural Stone Veneer ranks first among American Natural Stone Manufacturers in terms of quality service, unique product colors, exclusive finishes and Client-Business relationship.

WHO WE ARE

Natural Stone Veneer by Imexware is a trailblazing company for manufacturing natural stone to be thin veneer, applicable to all vertical and horizontal surfaces. As a General Contractor, Edgard Sargi has always found passion in helping people get the most of there living space and achieve their vision through his knowledge and creative, innovative spirit.

Founded in 2001, Natural Stone Veneer started as an idea to connect Indonesian Artisans and their families to the United States and fulfill the need of natural stone in the U.S. market.

By empowering the skills of the humble Indonesian people and investing in their knowledge of the natural hometown resource, we where able to achieve our goal by producing a one of a kind of Natural Stone Veneer, known

for its diversified colors and finishes. OurfactoryisbasedinSurabaya,Indonesiawhere we are breaking the cycle of extreme poverty through creating sustainable jobs for the current and the future generation. Now they are able to earn a stable, healthy income through dignified work, while staying close to their friends and families. In addition to the factory our office is based in Las Vegas, Nevada where you can get in touch with the natural stone by visiting us at our showroom and have the chance to get a free tour in our endless inventory or you can sit back, relax and let us ship the product to you. Your location is not a limit, we ship nationwide.

WHY CHOOSE NATURAL STONE VENEER?

When it comes to choosing tiles and claddings, it's hard to match the beauty and timelessness

of natural stone.

Natural stone has a history which has been in the making over many millions of years and embedded deep in the earth's crust is the Dolomitic Limestone.

At Natural Stone Veneer we cut and shape the stone into a range of tiles and claddings that can transform your living or work space.

As a natural element quarried in the tropical area of Surabaya, the Indonesian Dolomitic Limestone is known for its durability, high density, high resistance to water and to acidic content of rain and soil.

Our products are tested and certified to meet the highest quality of architectural specifications.

Last but not least, unlike synthetic stone, our products are virtually maintenance free.

Ledge Stone Horizontal/Vertical Corner	2”x3”x1.5”Vertical random lengths	Horizontal and Vertical corners available.
Mosaic	12”x12”x3/8” Thick 6”x12”x3/8” Thick 12”x12” Interlocking	Tumbled stone on mesh. Call for availability
Split Face	6”x random x 3/8” Thick 8”x random x 3/8” Thick 12”x random x 3/8” Thick	Random Lengths varies from 4”-24”
Split Face Corner	6” , 8” & 12” x random	Random lengths vary from 4”-12”
Stacked Stone	Random height and length pieces glued to make a 6”x24’ panel for easy installation	A mixture of color and size that creates an elegant blend
Tuscan Ashlar	Random size	Blend your own mixtures of our 16 colors
Wainscot	12”x1.5” your depth requirements	Deeply polished bull nose
Scored Full Chisel	8”x36” &8”x Random	Scored and Chiseled
Scored Bush Hammer	8”x36” & 8”x Random	Bush Hammer and Scored
Parquet	8”x36” Panel	Comes in Honed, Bush Hammer & Honed and Bush Hammer mixed 2” , 4” & 6” pieces in panel
Combed	12”x36” Panel	Flat finish with a scratched face

You have the option of ordering any size from our wide selection, so be creative! Keep in mind, one-piece seamless corners are available as well. The natural variation of colors within one color is what makes our stone special. Our product is a natural stone, which can have a color variance of up to 40%. To achieve the best results, your installer should always examine the entire shipment that was purchased to obtain a comprehensive view of the full range of colors and variance. The installer will thus be prepared to work to ensure an even mixture that can be enjoyed for a lifetime. We prepare and gauge the stone in our factory to make installation easy. For example, our ledgerstone 2"x random pieces come preinstalled on a 6"x24" interlocking panels as well as all our 6"x24" panels.

How easy will it be for your installer to just grab a panel and apply it on the wall.
Our Split Face and Bush Hammer are gauged and cut to size. The installer can either do a butt joint or grout the stone. (please refer to finishes)

Since our stone is natural, variation is unpredictable. Please allow variation in colors than described above.

COLORS	DESCRIPTION
Adam Blue	Light Gray background with veins of light and dark blue
Almond	Consistent light almond color with minimal variation
Battic	Almond based with small flecks of seashell
Black	Charcoal color with minimal variation in shades

Cape Cod Gray	Battic Based color with a high percentage of grayish seashells
Creamy Peach	Blend of tan, beige and peach shades

COLORS	DESCRIPTION
Desert Sand	Medium beige based color contained with black speckled veins
Oyster Gray	Combination of light to dark tones of gray
Red Camel	A mustard based color with red wine splotches and knots
Red Cherry	Red and beige base color with black speckled veins
Red Rock	Varying shades of rosy brick, mixed with gold and cream hues
Rojo Blush	Tan base with shades of red and black speckled veins
Sand Beige	Beige colored with minimal variation
Gray Basalt	Asphalt gray with black specs
Black Basalt	Dark color with minimal variation in shades

Our stone veneer is shipped in crates that are securely cushioned with Styrofoam. We stock over 500,000 square feet of various colors and finishes in our warehouse. After placing your order, delivery time will depend on stock availability, and geographic location. For custom orders, once order is placed, please allow 3-4 months for delivery time. We ship all over the united states and internationally using either our shipper or yours. If you buy a full container straight from the factory, the shipping is free, you pay for material only. If your shipment is less than a full container, shipping costs will apply depending on the quantity you’re ordering. A full container has a minimum quantity of 4500 square feet depending on the finish you select. You can also mix and match colors as well as finishes for a genuine look of your own.

INSTALLING:

Our stone is installed just like tile, using thin-set and cutting with a wet saw. You can install on exterior stucco surface, cement boards and masonry block. Installation on interior surfaces can be done the same way as exterior or on surface like drywall or plywood. Make sure substrate is attached properly to the structure prior to installation and read instructions on using thin-set to insure maximum adherence onto substrate. Natural Stone Veneer product has been created and engineered to be installed on an existing foundation without major preparation to the structure, which would make the stone one of the lightest natural split face stone on the market. Therefore, it can be installed with thin-set, and higher elevations can be achieved, creating endless possibilities.

For Ledge stone at 8lbs/sqft you can go up to 40 feet high without mechanical attachment.
For 6" Split Face at 6lbs/sqft you can go up to 50 feet high without mechanical attachment
For 8" Split Face at 8lbs/sqft you can go up to 50 feet high without mechanical attachment
For 12" Split Face at 12lbs/sqft you can go up to 26 feet high without mechanical attachment

The above values are generalized. You should ALWAYS check local building codes for the approved installation system of stone veneer. For added structural support to your drywall substrates, we recommend you install truss washer screws into your drywall through the studs. Though this is not necessary, the added assurance from an inexpensive preparation will ensure the stability of your drywall substrate. The truss washer screw is flat and thus will not interfere with the installation of our Natural Stone Veneer.

GROUTING:

Grouting will depend on your taste and the look you are trying to achieve. Our product can be butt jointed with no grout line. You decide! Sometimes grouting is used in a freezing climate to prevent water from getting behind the stone.

SEALING:

Sealing the stone is not necessary. However, it can be added as extra protection, especially for the grout lines and/or to prevent damage if regularly exposed to water. Two sealants can be used deep sealer or surface sealer. The deep sealer will not change the natural look of the stone, whereas the surface sealer will enhance the colors of your stone and can add either a glossy or a matte finish. Simply wet a sample with water to demonstrate the color after surface sealing.

Our stone is virtually maintenance free. You can sand blast or pressure-wash the stone depending on the depth of the stain. All above figure can be changed depending on your jurisdiction and construction code enforcement. Check with your local structural engineer for all the specifics on your project.
