1. INSTALLATION PRECAUTIONS

1. When you open the product packaging, please check the product and accessories at first. If there are any discrepancies, please contact us promptly. We will provide you with a satisfactory solution.
2. The hot and cold water supply pipe of the valve must be properly connected. When facing the front of the valve, the hot water supply is on the left and cold water supply is on the right. Incorrect connection will cause permanent damage to the cartridge.
3. If the accessories to be changed without affecting the use, we will not make a prior notice.
4. The impurities in the water supply pipe must be cleared before installation to avoid blockage.
5. The water pressure of the faucet is 0.05MPa-1.0MPa (including cold water and hot water Pressure). Applicable water temperature range: 39°F-194°F.

2. PREPARATION BEFORE INSTALLATION

CONNECTION ADVICE

Handy hand: Tighten the hose to the valve and add a quarter turn using the paper wedge. Tighten more if needed.

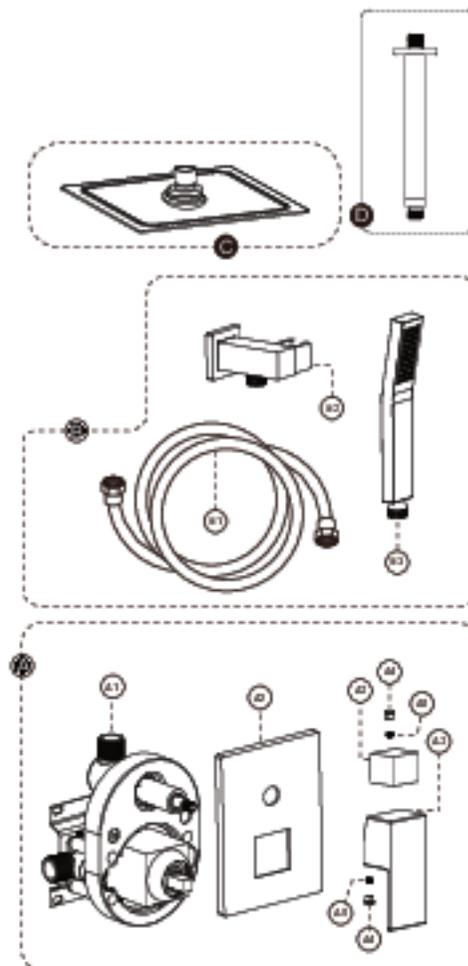

Apply plumber's putty under the plastic cover deck plate to seal your installation. *The model shown in the installation steps may differ from the one in box however connection type and installation steps are the same.

Plumber's putty

Thread seal tape

Included
