

All-In-One Laser Mounting Pole with Tripod

Model #: 40-6301
UPC:

Johnson's multi-functional laser pole with tripod is all you need to adjust your laser height for interior projects up to 11'. The laser pole's standard 5/8"-11 (or 1/4"-20 included thread adapter) is compatible with most lasers while its quick release clamp makes it easy to position your level at the needed height. You won't need to worry about your laser shifting or moving out of alignment thanks to the pole's spring-loaded end that provides a tight compression fit from floor to ceiling. Storing and transporting your laser pole with tripod is a snap with the included soft-sided case that boasts custom compartments and reinforced carrying strap, keeping your tool clean and safe when not in use.

PRODUCT DETAILS

- Heavy-duty aluminum tripod and telescoping laser pole
- Spring-loaded end provides tight compression fit from floor to ceiling

APPLICATION

This laser pole with tripod is a must-have for indoor job sites and is the perfect accessory for your laser. It simplifies leveling work by easily adjusting your laser to virtually any height, making it ideal for hanging drywall, shelving or cabinets, laying tile, installing drop ceilings and any other indoor leveling project. Integrated tripod for use without contacting ceiling, ideal for freshly painted ceilings.
