ASCLEPIAS INCARNATA PINK SUPPORT THE MONARCHS

BRING HOME THE BUTTERFLIES! Asclepias is also known by its common name "Milk Weed", among several others. It is a herbaceous perennial. Tropical, multitasking milk weed attracts monarch butterflies that use the plant as a source for nectar. Monarch butterflies lay eggs on this plant, and in turn, the resulting larvae (Caterpillars) use the plant leaves as a food source. Plant en masse to create curb appeal and to help support threatened wild life. It is very easy to care for, deer and rabbit resistant, and will still flower while it produces seed-blooms all season. Starting with our sizable roots instead of seed, they assure a full season of bloom.

*help pollinators thrive*

*tropical exotic species*

*can be grown as an annual  
as well in more northern regions*

*About This Variety:* Asclepias incarnata Pink, produces branching stems, with small fragrant pink to mauve flowers.

*Growing Instructions:* Plant nearly anywhere as it tolerates unimproved soils. Plants can be overwintered indoors in more northern zones in which the plants are not hardy.

*Care Tip:* The plants require little maintenance as long as they are planted properly and establish themselves.

*Exposure:* full sun

*Height:* grows 48-60" tall

*Spacing:* plant 24-36" apart, 1.5-2" deep

*USDA Zones:* hardy in USDA zones 4-9

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
