Concealed box installation instructions

Adjust the height of the blank floor according to the lowest concealed box depth 70-100MM.

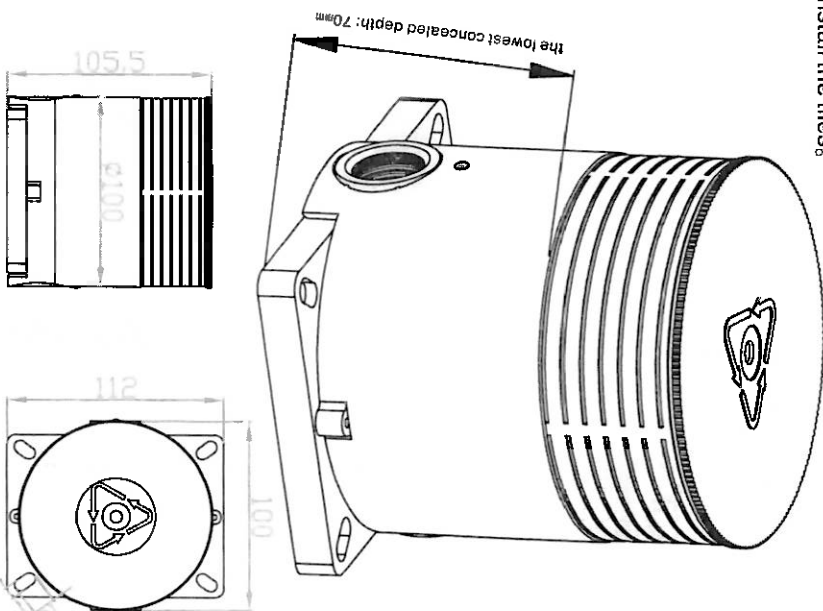

Draw lines and drill the holes, put the concealed box vertically.

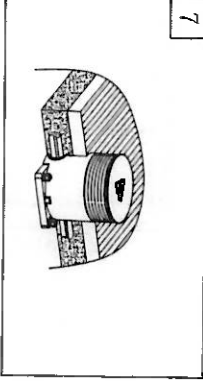

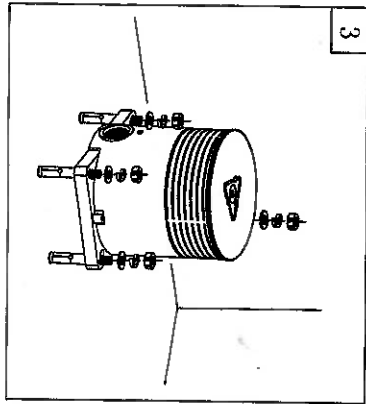

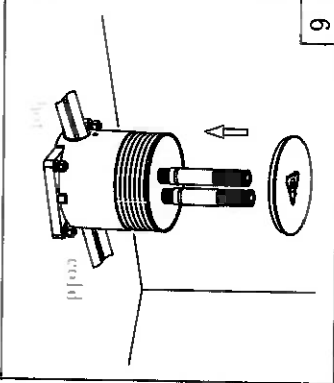

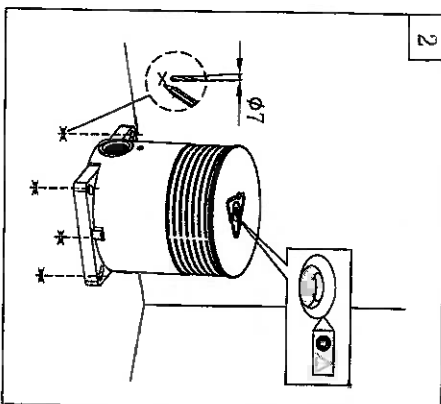

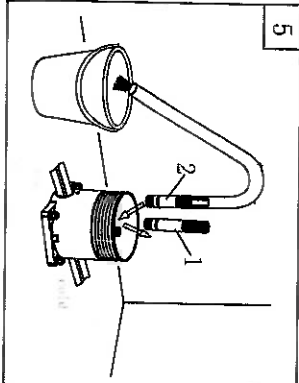

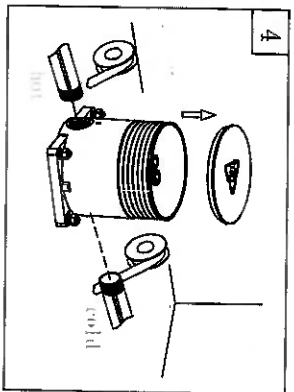

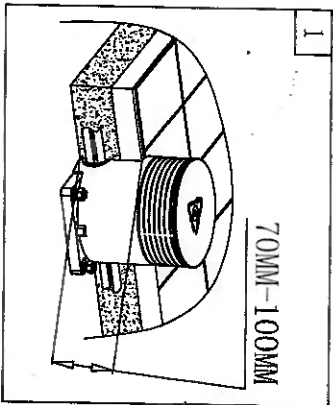

Fix it by expansion screws.

Connect the cold and hot water inlets, Open the cover of the concealed box; Confirm the leakage or not.

Open the plug firstly, Then put the drain water connector into the proper position to let the mud and sands out.

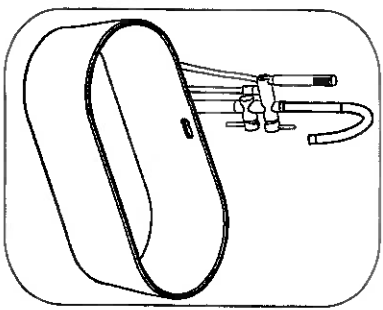

Put back the plugs properly and close the concealed box cover. Install the tiles.

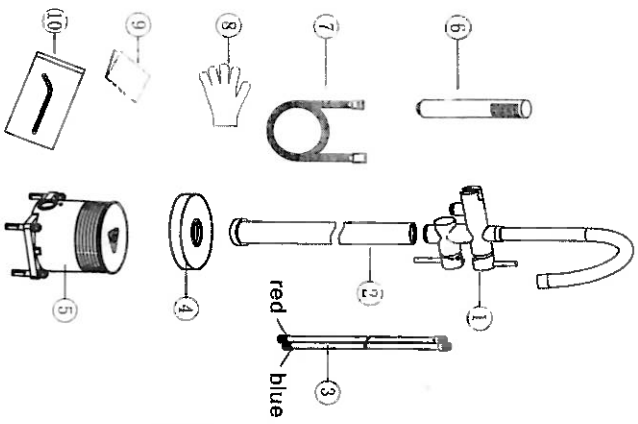

Free Standing Bathtub Faucet
