**SAVE THIS MANUAL FOR FUTURE REFERENCE.**

# ACURITE®

Congratulations on your new AcuRite product. To ensure the best possible product performance, please read this manual in its entirety and retain it for future reference.

## Unpacking Instructions

Remove the protective film that is applied to the LCD screen prior to using this product. Locate the tab and peel off to remove.

## Package Contents

1. Display unit with tabletop stand
2. Outdoor sensor
3. Instruction Manual

<b>IMPORTANT</b>	PRODUCT MUST BE REGISTERED TO RECEIVE WARRANTY SERVICE
<b>PRODUCT REGISTRATION</b> Register online to receive 1 year warranty protection <a href="http://www.AcuRite.com">www.AcuRite.com</a>	<b>SUPPORT</b> Support Forum Archived Products ▶ Register a Product

## Features & Benefits

### OUTDOOR SENSOR

- 1. Integrated Hanger**  
for easy placement.
- 2. Wireless Signal Indicator**  
Flashes when data is being sent to the display unit.
- 3. Battery Compartment Cover**

## Features & Benefits

### DISPLAY UNIT FRONT

- 1. Sensor Low Battery Indicator**
- 2. Outdoor Sensor Signal Strength**
- 3. Current Outdoor Temperature**  
Arrow icon indicates the direction temperature is trending.
- 4. TODAY'S HIGH Indicator**  
Indicates today's HIGH records are being viewed.
- 5. TODAY'S LOW Indicator**  
Indicates today's LOW records are being viewed.
- 6. 12 to 24 Hour Weather Forecast**  
Self-Calibrating Forecasting pulls data from the outdoor sensor to generate your personal forecast.
- 7. Current Indoor Humidity**
- 8. Date**
- 9. Moon Phase**
- 10. ◆ Button**  
For viewing HIGH and LOW records.
- 11. Display Low Battery Indicator**
- 12. Intelli-Time® Clock**  
Pre-programmed to the correct time and automatically updates for Daylight Saving Time.
- 13. Current Indoor Temperature**
- 14. Current Barometric Pressure**  
Arrow icon indicates the direction pressure is trending.
- 15. Learning Mode Icon**  
Disappears after weather forecast self-calibration is complete.

## Features & Benefits

### DISPLAY UNIT BACK

- 1. ▼ Button**  
For setup preferences and viewing LOW records.
- 2. Intelli-Time® Battery Compartment**
- 3. Battery Compartment Cover**
- 4. Battery Compartment**
- 5. SET Button**  
For setup preferences.
- 6. ▲ Button**  
For setup preferences and viewing HIGH records.
- 7. Integrated Hang Hole**  
For easy wall mounting.

## SETUP

### Sensor Setup

#### Install or Replace Batteries

AcuRite recommends high quality alkaline or lithium batteries in the outdoor sensor for the best product performance. Heavy duty or rechargeable batteries are not recommended.

The sensor requires lithium batteries in low temperature conditions. Cold temperatures can cause alkaline batteries to function improperly. Use lithium batteries in the sensor for temperatures below -4°F / -20°C.

1. Slide off the battery compartment cover.
2. Insert 2 x AA batteries into the battery compartment, as shown. Follow the polarity (+/-) diagram in the battery compartment.
3. Replace the battery cover.

**LITHIUM BATTERIES** -40°F (-40°C) (70°C) 158°F

**ALKALINE BATTERIES** -4°F (-20°C) (70°C) 158°F

#### **PLEASE DISPOSE OF OLD OR DEFECTIVE BATTERIES IN AN ENVIRONMENTALLY SAFE WAY AND IN ACCORDANCE WITH YOUR LOCAL LAWS AND REGULATIONS.**

**BATTERY SAFETY:** Clean the battery contacts and also those of the device prior to battery installation. Remove batteries from equipment which is not to be used for an extended period of time. Follow the polarity (+/-) diagram in the battery compartment. Promptly remove dead batteries from the device. Dispose of used batteries properly. Only batteries of the same or equivalent type as recommended are to be used. DO NOT incinerate used batteries. DO NOT dispose of batteries in fire, as batteries may explode or leak. DO NOT mix old and new batteries or types of batteries (alkaline/standard). DO NOT use rechargeable batteries. DO NOT recharge non-rechargeable batteries. DO NOT short-circuit the supply terminals.

## Display Unit Setup

### 1 Install or Replace Batteries

AcuRite recommends high quality alkaline batteries in the display unit for the best product performance. Heavy duty or rechargeable batteries are not recommended.

1. Remove the battery compartment cover.
2. Insert 3 x AAA alkaline batteries into the battery compartment, as shown. Follow the polarity (+/-) diagram in the battery compartment.
3. Replace the battery cover.

### PLEASE DISPOSE OF OLD OR DEFECTIVE BATTERIES IN AN ENVIRONMENTALLY SAFE WAY AND IN ACCORDANCE WITH YOUR LOCAL LAWS AND REGULATIONS.

**BATTERY SAFETY:** Clean the battery contacts and also those of the device prior to battery installation. Remove batteries from equipment which is not to be used for an extended period of time. Follow the polarity (+/-) diagram in the battery compartment. Promptly remove dead batteries from the device. Dispose of used batteries properly. Only batteries of the same or equivalent type as recommended are to be used. DO NOT incinerate used batteries. DO NOT dispose of batteries in fire, as batteries may explode or leak. DO NOT mix old and new batteries or types of batteries (alkaline/standard). DO NOT use rechargeable batteries. DO NOT recharge non-rechargeable batteries. DO NOT short-circuit the supply terminals.

## **Intelli-Time® Clock**

Intelli-Time products are pre-programmed with the correct time and date. Intelli-Time technology instructs the time and date to set themselves. All you need to do is select your Time Zone and Daylight Saving Time preferences. The clock will then automatically set itself and change for Daylight Saving Time.

### **Set the Time, Date & Units**

Press and release the SET button to enter SETUP MODE. Once in setup mode, the preference you are currently setting will blink on the display.

To adjust the currently selected (flashing) item, press and release the “▲” or “▼” buttons located on the back of the display (press and HOLD to fast adjust).

To save your adjustments, press and release the SET button again to adjust the next preference. The preference set order is as follows:

DST\* (Daylight Saving Time ON or OFF)  
TIME ZONE (NST AST EST CST MST PST AKT HAT)  
CLOCK HOUR  
CLOCK MINUTE  
CALENDAR MONTH  
CALENDAR DATE  
CALENDAR YEAR  
TEMPERATURE SCALE (°F or °C)  
BAROMETRIC PRESSURE SCALE (inHg or hPa)

\*If you live in an area that observes daylight saving time, DST should be set to ON, even if it is not currently Daylight Savings Time.

You will automatically exit SETUP MODE if no buttons are pressed for 8 seconds. Enter setup mode at any time by pressing the SET button.

## Placement for Maximum Accuracy

AcuRite sensors are sensitive to surrounding environmental conditions. Proper placement of both the display unit and outdoor sensor are critical to the accuracy and performance of this product.

### Display Unit Placement

Place the display unit in a dry area free of dirt and dust. Display unit stands upright for tabletop use or is wall-mountable.

### Outdoor Sensor Placement

Sensor must be placed outside to observe outdoor conditions. Sensor is water resistant and is designed for general outdoor use, however, to extend its life place the sensor in an area protected from direct weather elements.

Hang the sensor using the integrated hang holes or hanger, or by using string (not included) to hang it from a suitable location, like a well covered tree branch. The best location is 4 to 8 feet above the ground with permanent shade and plenty of fresh air to circulate around the sensor.

## Important Placement Guidelines

- To ensure accurate temperature measurement, place units out of direct sunlight and away from any heat sources or vents.
- Display unit and outdoor sensor must be within 165 ft (50 m) of each other.
- To maximize wireless range, place units away from large metallic items, thick walls, metal surfaces, or other objects that may limit wireless communication.
- To prevent wireless interference, place both units at least 3 ft (.9 m) away from electronic devices (TV, computer, microwave, radio, etc.).

## Setup is Complete

The sensor will now synchronize with the display unit. It may take a few minutes for synchronization to complete. Please refer to the troubleshooting section of this manual if anything appears to be functioning improperly.

## OPERATION

### Using the Weather Station

#### Learning Mode

Self-Calibrating Forecasting uses a unique algorithm to analyze changes in pressure over a time period (called Learning Mode) to determine your altitude. After 14 days, the Learning Mode icon disappears from the display screen. At this point, the self-calibrated pressure is tuned in to your location and the unit is ready for superior weather prediction.

#### Weather Forecast

AcuRite's patented Self-Calibrating Forecasting provides your personal forecast of weather conditions for the next 12 to 24 hours by collecting data from the sensor in your backyard. It generates a forecast with pinpoint accuracy - personalized for your exact location.

View the complete list of icons at [www.AcuRite.com/acurite-icons](http://www.AcuRite.com/acurite-icons)

#### Moon Phase

Track the phases of the moon, conveyed through simple lunar phase icons:

#### Barometric Pressure

Subtle variations in barometric pressure greatly affect the weather. This weather station displays the current pressure with an arrow icon to indicate the direction the pressure is trending (FALLING, STEADY, or RISING).

#### High & Low Records

View today's high or low records by pressing and releasing the "◆" button located on the front of the display, or by pressing the "▲" or "▼" buttons located on the back of the display. Press and release again to view current readings.

To manually clear all of today's LOW recorded values, press and release the "▼" button located on the back of the display to view low records, then press and hold the "▼" button located on the back of the display for 2 seconds.

Dashes display to confirm you have cleared the LOW records.

To manually clear all of today's HIGH recorded values, press and release the "▲" button located on the back of the display to view high records, then press and hold the "▲" button located on the back of the display for 2 seconds.

## Troubleshooting

Problem	Possible Solution
<p><b>No outdoor sensor reception</b></p> 	<p>If the wireless signal indicator shows no bars:</p> <ul style="list-style-type: none"> <li>Relocate the display unit and/or the outdoor sensor. The units must be within 165 ft (50 m) of each other.</li> <li>Make sure both units are placed at least 3 feet (.9 m) away from electronics that may interfere with the wireless communication (such as TVs, microwaves, computers, etc).</li> <li>Use standard alkaline batteries (or lithium batteries in sensor when temperature is below -4°F/-20°C). Do not use heavy duty or rechargeable batteries. NOTE: It may take up to 20 minutes for display unit and sensor to synchronize after batteries are replaced.</li> </ul>
<p><b>Display screen not working</b></p>	<ul style="list-style-type: none"> <li>Check that the batteries are installed correctly. Batteries may need to be replaced.</li> </ul>
<p><b>Outdoor temperature is flashing or showing dashes</b></p>	<p>Flashing of the outdoor temperature is generally an indication of wireless interference.</p> <ol style="list-style-type: none"> <li>Bring both the sensor and display unit indoors and remove at least one battery from each.</li> <li>Reinstall the battery in the outdoor sensor.</li> <li>Reinstall the battery in the display unit.</li> <li>Let the units sit within a couple feet of each other for about 20 minutes to gain a strong connection.</li> </ol>
<p><b>Inaccurate forecast</b></p>	<ul style="list-style-type: none"> <li>Weather Forecast icon predicts conditions for the next 12 to 24 hours, not current conditions.</li> <li>Has Learning Mode icon disappeared from the display unit? Learning Mode must complete before forecast and pressure will be accurate.</li> <li>Allow unit to run continuously for 33 days. Battery removal or resetting the display unit will restart Learning Mode. After 14 days, forecast should be fairly accurate, however Learning Mode calibrates for a total of 33 days.</li> </ul>
<p><b>Inaccurate temperature or humidity</b></p>	<ul style="list-style-type: none"> <li>Make sure both the display unit and sensor are placed out of direct sunlight and away from any heat sources or vents (see page 8).</li> <li>Make sure the display unit is positioned away from moisture sources (see page 8).</li> </ul>

**If your AcuRite product does not operate properly after trying the troubleshooting steps, visit [www.AcuRite.com](http://www.AcuRite.com) or call (877) 221-1252 for assistance.**

## **Care & Maintenance**

### **Display Unit Care**

Clean with a soft, damp cloth. Do not use caustic cleaners or abrasives. Keep away from dust, dirt and moisture. Clean ventilation ports regularly with a gentle puff of air.

### **Outdoor Sensor Care**

Clean with a soft damp cloth. Do not use caustic cleaners or abrasives.

## **Calibration**

### **Calibrate Temperature & Humidity**

The indoor temperature and humidity and outdoor temperature readings can be calibrated on the display unit to improve accuracy. Calibration can improve accuracy when sensor placement or environmental factors impact your data accuracy.

1. To access calibration mode, press AND HOLD the "▲", "▼", and "SET" buttons for at least 5 seconds.
2. Once in calibration mode, the preference you are currently setting will be highlighted on the display.
3. Press the "▲" or "▼" buttons to calibrate the data value higher or lower from the actual reading.
4. Press the "SET" button to confirm the calibration adjustment. The "∞" icon will remain illuminated next to calibrated values.
5. The next adjustable data will begin flashing, indicating it is ready to be calibrated. Repeat Steps 1 - 4 to calibrate additional data.

The preference set order is as follows:

OUTDOOR TEMPERATURE

INDOOR TEMPERATURE

INDOOR HUMIDITY

BAROMETRIC PRESSURE (must be set to MANUAL mode; see page 12)

After 20 seconds of inactivity, the display will save the adjustments and exit calibration mode. Note: Calibrations will be erased if the display is reset or if batteries are removed and the power adapter is unplugged.

## Calibrate Barometric Pressure

The weather station default pressure mode is "AUTO". In auto mode, the pressure will calibrate itself over a 14 day Learning Mode. Barometric pressure can be manually calibrated:

1. Press AND HOLD the "SET" button (located on the back of the display unit) for at least 10 seconds to enter manual pressure mode.
2. The un-calibrated pressure will be displayed. Press AND HOLD the "▲", "▼", and "SET" buttons for at least 5 seconds.
3. Press and release the "SET" button three times to enter barometric pressure calibration mode.
4. Press the "▲" or "▼" buttons to calibrate the pressure higher or lower.
5. Press the "SET" button to confirm the calibration adjustment.

Note: The "∞" icon will remain illuminated next to the calibrated value.

After 20 seconds of inactivity, the display will save your adjustments and exit calibration mode. Note: Calibration will be erased if the display is reset, set to auto pressure mode, or if the batteries are removed and power adapter is unplugged.

To exit manual pressure mode and return to auto pressure mode press and hold the "SET" button for at least 10 seconds.

## Replace Intelli-Time Clock Battery

Intelli-Time technology is powered by a pre-installed coin-cell battery that stores the time and date settings. The battery has a shelf life of several years. Time and date will need to be entered after replacing Intelli-Time battery. To replace the Intelli-Time battery:

1. Locate the coin cell battery compartment door in the battery compartment of the display unit. Unscrew and remove the compartment cover.
2. Insert 1 x CR2032 coin cell battery into the battery compartment, as shown. Install battery with "+" positive terminal facing OUT.
3. Screw in the battery cover.

**WARNING: THIS PRODUCT CONTAINS A BUTTON-CELL BATTERY. IF SWALLOWED, IT COULD CAUSE SEVERE INJURY OR DEATH IN JUST 2 HOURS. SEEK MEDICAL ATTENTION IMMEDIATELY IF INGESTED.**

## Specifications

<b>TEMPERATURE RANGE</b>	Outdoor: -40°F to 158°F; -40°C to 70°C
	Indoor: 32°F to 122°F; 0°C to 50°C
<b>HUMIDITY RANGE</b>	Indoor: 1% to 99% RH
<b>WIRELESS RANGE</b>	165 ft / 50 m depending on home construction materials
<b>OPERATING FREQUENCY</b>	433 MHz
<b>POWER</b>	Display: 3 x AAA alkaline batteries
	Sensor: 2 x AA alkaline or lithium batteries
<b>DATA REPORTING</b>	Outdoor: 30 second updates
	Indoor: 60 second updates

## FCC Information

This device complies with part 15 of FCC rules. Operation is subject to the following two conditions:

- 1- This device may NOT cause harmful interference, and
- 2- This device must accept any interference received, including interference that may cause undesired operation.

**WARNING:** Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**NOTE:** The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user authority to operate the equipment.

This device complies with Industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions:

- (1) This device may not cause interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation of the device.

## Customer Support

AcuRite customer support is committed to providing you with best-in-class service. **For assistance**, please have the model number of this product available and contact us in any of the following ways:

## Limited One Year Warranty

At AcuRite, we proudly uphold our commitment to quality technology. Chaney Instrument Co. warrants that all products it manufactures to be of good material and workmanship, and to be free of defects when properly installed and operated for a period of one year from the date of purchase.

We recommend that you visit us at [www.AcuRite.com](http://www.AcuRite.com) for the fastest way to register your product. However, product registration does not eliminate the need to retain your original proof of purchase in order to obtain warranty benefits.

Chaney Instrument Co. warrants that all products it manufactures to be of good material and workmanship, and to be free of defects when properly installed and operated for a period of one year from the date of purchase. Remedy for breach of this warranty is limited to repair or replacement of the defective item(s). Any product which, under normal use and service, is proven to breach the warranty contained herein within ONE YEAR from date of sale will, upon examination by Chaney, and at its sole option, be repaired or replaced by Chaney. Transportation costs and charges for returned goods shall be paid for by the purchaser. Chaney hereby disclaims all responsibility for such transportation costs and charges. This

warranty will not be breached, and Chaney will give no credit for products it manufactures which have received normal wear and tear, been damaged (including by acts of nature), tampered, abused, improperly installed, damaged in shipping, or repaired or altered by others than authorized representatives of Chaney.

The above-described warranty is expressly in lieu of all other warranties, express or implied, and all other warranties are hereby expressly disclaimed, including without limitation the implied warranty of merchantability and the implied warranty of fitness for a particular purpose. Chaney expressly disclaims all liability for special, consequential or incidental damages, whether arising in tort or by contract from any breach of this warranty. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. Chaney further disclaims all liability from personal injury relating to its products to the extent permitted by law. By acceptance of any of Chaney's products, the purchaser assumes all liability for the consequences arising from their use or misuse. No person, firm or corporation is authorized to assume for Chaney any other liability in connection with the sale of its products. Furthermore, no person, firm or corporation is authorized to modify or waive the terms of this paragraph, and the preceding paragraph, unless done in writing and signed by a duly authorized agent of Chaney. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

For in-warranty claims: Chaney Instrument Co.  
965 Wells St., Lake Geneva, WI 53147
