

Van Zyverden's
DWARF IRIS EYE CATCHER

These graceful, bulbous, perennial irises grow elegant flowers that bloom atop grass-like foliage. They are easy to grow, and, if zone appropriate, are great for naturalizing.

Beautiful blooms

Hard to find variety

Returns each year

About This Variety: Eyecatcher Irises are a catch if you can get a hold of them. They are somewhat rare and not so commercially grown. Being of the dwarf type it's a good choice for under plantings. Its petals are heavily patterned with white, blue and yellow. Some would say that they are a work of art.

Growing Instructions: Choose a site that has reasonably fertile soil and plenty of moisture that won't dry out in summer. Good drainage and a sheltered location will help them survive the winter.

Care Tip: Plant about 30 bulbs per square foot. Zone 5 gardeners should add a 2" layer of mulch in fall. Best planted in large numbers.

Exposure: Full Sun to Partial Shade

Height: Grows 2-4" tall

Spacing: Plant 3" apart, 4" deep

USDA Zones: hardy in USDA zones 5-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
