Certificate for Hubbell-Bell LL800 Series LED Swivel Floodlight, 800 Lumens

To Whom This May Concern:

This is to certify that the "Bell" branded product referenced above consumes approximately 85% less energy than comparable 60W incandescent bulbs producing 800 Lumens of 3000K warm white light. The claim is supported by:

$$[60W \text{ (incandescent)} - 8W \text{ (LL800 LED)}] \div 60W \text{ (incandescent)} = 0.87$$

For reference purposes, these assumptions are backed by publicly available Energy Star LED/CFL testing data found below:

<https://www.sust-it.net/incandescent-bulbs-lumens-to-watts-conversion-led.php>

Sincerely,

Dan Gibson
