HOSTA MIRACLE LEMONY - FIRST EVER YELLOW FLOWERING

Hostas are not grown for their flowers but for their foliage. They come in a spectrum of blues, golds, greens, yellows and whites as well as variegated, some speckled and others striped. They thrive in the shade, even though they can withstand some sun. They are long-lived and very low-maintenance. Many hosta varieties have seasonal color or can change color depending on growing conditions. While there are well over 3,000 cultivars to choose from, we offer a range of foliage shapes, colors and sizes. Hostas can take years to fully mature, each year exhibiting a change in color, texture and form.

*Rare color*

*Lush foliage*

*Returns bigger and more  
impressive each year*

*About This Variety:* Even though hostas are primarily grown for their foliage, we are going to contradict ourselves in that what makes this newer hosta so special - its flowers. Its claim to fame is that it is the first hosta to produce yellow flowers. They are fragrant and are a colorful addition to the shade garden. Stands out against a green back drop. Limited availability. Sure to sell out early in the season.

*Growing Instructions:* While drought tolerant, they do not like being kept dry for too long. They prefer rich, well-drained soil with a consistent supply of moisture

*Care Tip:* Basically maintenance free. Clip out dead flower stalks after blooming.

*Blooms:* Summer

*Exposure:* Partial Shade to Full Shade

*Height:* Grows 12" tall

*Spacing:* Plant 24" apart, 1.5-2" deep

*USDA Zones:* Hardy in USDA zones 3-9

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
