

mounting instructions

1.

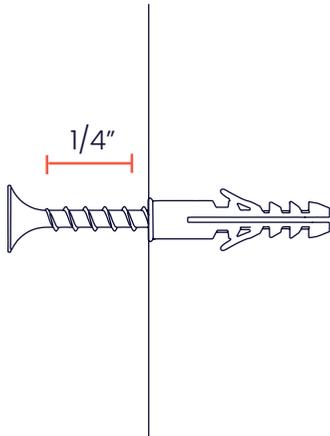

Position mounting template on the wall at the desired location. Make sure the unit is level and mark the drill holes.

2.

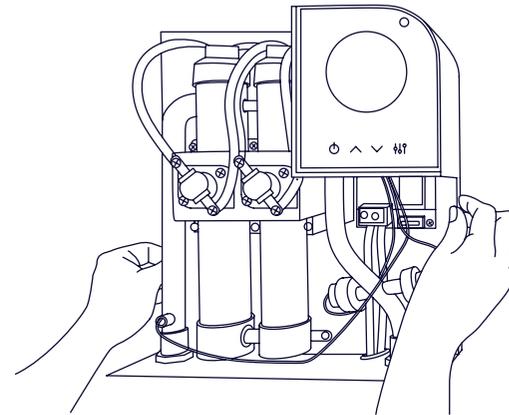

Remove mounting template. If mounting on drywall, use a 1/2" bit to drill pilot holes where the markings were made.

3.

Use (4) drywall anchors and (4) mounting screws. Insert the anchors into the drilled holes, then thread screws into anchors. Do not thread screws all the way down. Leave them out about 1/4".

4.

Remove front cover of heater. Align screws with the mounting holes on the back of heater and gently place it onto the wall. Make sure the unit is secure before letting go.

Congratulations! You have successfully mounted your Optimal water heater. For instructions on plumbing and electrical installation, please refer to the installation manual provided with your unit, or visit: [itsoptimal.com](https://www.itsoptimal.com) for a digital version.
