

Cleaning Interior Wood Doors with Glass

Plastic film protection on the glass should be removed immediately after applying the finish.

Failure to remove the plastic film at this time may cause harm to the glass and may create difficulty in removing the film. Use caution to avoid scratching the glass while cleaning it. Glass that is scratched due to cleaning is not covered by the warranty. Film should be removed by scoring edges carefully under sticking or profile edge and peeled off by hand.

DO:

- Clean glass when dirt and residue appear
- Exercise special care when cleaning coated glass surfaces
- Avoid cleaning tinted and coated glass surfaces in direct sunlight
- Start cleaning at the upper level of glass and continue to lower levels
- Soak the glass surface with clean water and soap solution to loosen dirt and debris
- Use a mild, non-abrasive commercial window cleaning solution
- Use a squeegee to remove all the cleaning solution
- Dry all cleaning solution from window gaskets, sealants and frame
- Prevent conditions that can damage the glass

DON'T:

- Don't use scrapers of any size or type for cleaning glass
- Don't allow dirt and residue to remain on glass for an extended period
- Don't begin cleaning glass without knowing if a coated surface is exposed
- Don't clean tinted or coated glass in direct sunlight
- Don't allow water or cleaning residue to remain on the glass or adjacent materials
- Don't begin cleaning without rinsing excessive dirt and debris
- Don't use abrasive cleaning solutions or materials
- Don't allow metal parts of cleaning equipment to contact the glass
- Don't trap abrasive particles between the cleaning materials and the glass surface
- Don't allow other trades to lean tools or materials against the glass surface
- Don't allow splashed materials to dry on the glass surface
