

Titan Type S/M High Strength Masonry Cement

Recommended Uses:

- Titan America® High Strength Masonry Cement has a proven track record.
- This product is specifically designed to produce a Type S or Type M Masonry Cement to be used in the installation of concrete block, decorative stone, brick, and many other masonry applications.

Mixing Instructions

- Titan America® High Strength Masonry Cement will not perform as designed if the mixing instructions and proportions are not followed correctly. It is important to ensure that the product does not dry out prematurely; this condition can affect overall strength and durability of the finished product.
- Mix mortar in a mechanical mixer as follows:
 - 1) Add approximately 2/3 of the potable water required.
 - 2) Add 1/2 of the sand (ASTM C-144 approved) required.
 - 3) Add Titan America® High Strength Masonry Cement.
 - 4) Add the remainder of the sand (ASTM C-144 approved).
 - 5) Add enough potable water to bring the mortar to the desired consistency.
 - 6) Allow mortar to mix 5 minutes from the introduction of the last ingredient.
