Installation Steps:

- 1: Locate the LED driver and prepare for remote installation within the junction box.
- 2: Using UL recognized wire nuts connect the building power wires to the LED driver.
- 3: Place LED driver into the Junction Box. 4 inch octagon box only.
- 4: Locate the mounting plate and LED module. Feed the LED module connector and ground wire through the mounting plate center hole.
- 5: Connect the LED driver (male connector) to the LED module (female connector.)
 - a. IMPORTANT - DO NOT connect fixture to a driver that is energized/powering on. Connect LED driver to the fixture before powering on the LED driver.
- 6: Use UL recognized wire nuts to secure LED module Ground to building Ground (Earth).
- 7: Secure mounting plate to junction box with (2) junction box screws.
- 8: Secure LED module to mounting plate with (2) allen wrench set screws.
