User installation manual

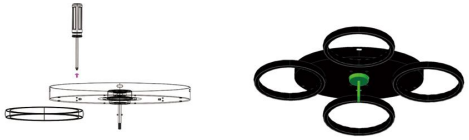

Tips : To ensure safe use , please entrust professional installation , inspection , and maintenance .
Before installation,power on the lamp to test whether it is functioning normally . Besure to install it only after turning off the power .

Step 1: Before installing the fan light, please carefully read and understand this manual, and compare it with the product display diagram to ensure that all components are installed properly.

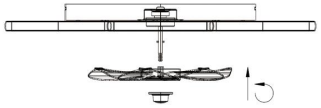

Step 2: Hanging board installation,Use a 4 * 35 sinker to hit the cross hanging board to the ceiling.

Step 3:Align the holes of the single ring with the holes of the elliptical chassis, fix them with 2 M4 * 6 screws, and use the same method to fix the four single ring on the elliptical chassis.

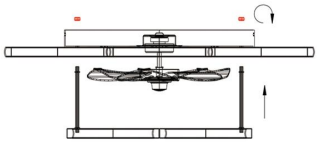

Step 4: Blade installation: Take out the blades, clamp the blade slots into the motor slots, and tighten them with locking nuts.
Attention: The locking nut of the fan blade is tightened counterclockwise.

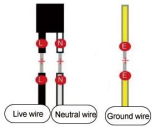

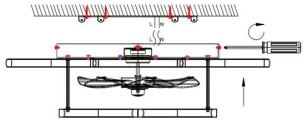

Step 5: Install the inner luminous double ring, tighten the short tooth end of the four M6 * 130 hollow double teeth tubes clockwise on the inner luminous double ring.
Pay attention to one line that needs to be threaded through the dental canal.

Step 6: The inner luminous double ring is installed on the elliptical chassis of the lamp through the long tooth end of the double threaded tube using an M6 mm nut.

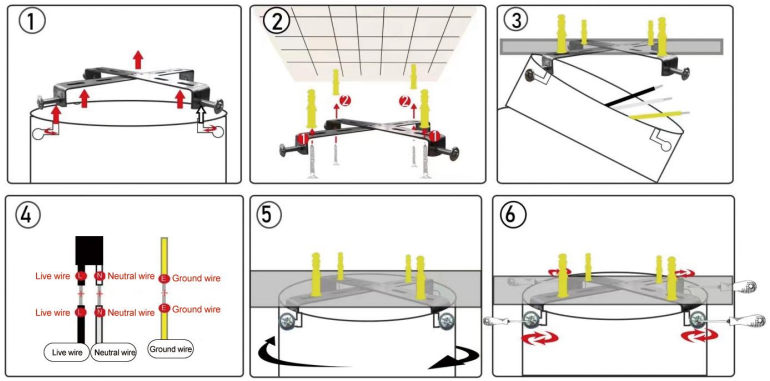

Step.7: Wiring neutral wire,live wire ,and ground wire

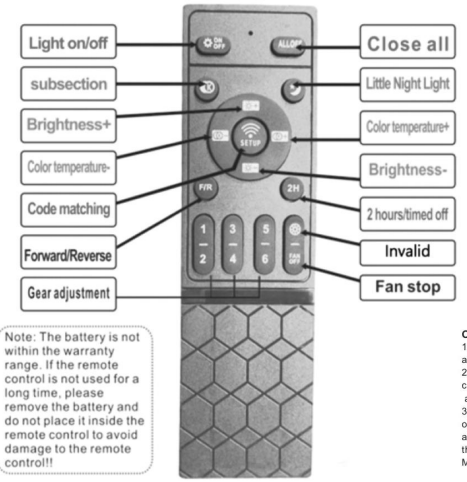

Step 8: Then align the U-shaped holes on the side of the ceiling panel with the hanging plate holes and lock them with 4 M4 * 12 screws.
