

Pendant Light Installation Instruction

Please read the instruction manual carefully before using

Dear Customer,

Thank you for choosing our chandelier! To save your time and effort, please try to light up the lamp before installation to ensure the sockets are working correctly. If you have any questions when you receive it, please contact us directly. We will provide good after-sales service and solve the problem for you.

- Customer Support Team

Package List

Brown Rattan Lampshade	1
Lampholder	1
Ceiling Plate and Hanging Chain	1
Instruction & Pack of Hardware	1

Installation

① Pass the wire attached to the lampholder through the round hole at the top of the lampshade and then through the round hole at the bottom of one of the rings, and then tighten the ring onto the top of the lampshade.

② Pass the wire randomly through the hanging chain, then through the round hole of the ring that has been assembled with the ceiling plate, and then connect the other end of the chain to the ring on the lampshade.

③ Secure the Bracket: Mount the bracket onto the junction box by tightening the 2 screws. (You can also drill 2 holes and then Insert anchors before mounting the bracket if there is no junction box.)

④ Hardwired way: Connect the Black (Live) wire to the "L" wire and White (Zero) wire to the "N" wire by screwing the orange wire caps (connectors) on clockwise, the copper wire needs to be wrapped around the green screw or connect to your earth wire.

⑤ Finally, fix the lamp and bracket with screws.

Q: The lamp does not work?

A: First, make sure your bulbs are working well.
If your bulbs work, but not on the lamp, please pull the copper piece which is located in the bulb socket. This operation is to ensure that the bulb makes good contact with the copper in the bulb socket.
