

HOW TO INSTALL

1. Secure the screw hooks: Select two points for the screw hooks, ensuring the distance is less than the length of the runner cable.

2. Attach the cable with shock absorber: Hang one end of the cable, equipped with the shock absorber spring, onto one of the screw hooks.

3. Thread the cable through the pulley: Loop cable around thimble and clip cable together using cable clips. Keep the cable clips slightly loose for now.

4. Adjust and secure the cable: Hang the looped end of the cable onto the screw hook. Pull the loose end of the cable to adjust the tension, then tighten all cable clips securely. Use the remaining clips as pulley stops.

5. Attach the Tie-Out: Connect the tie-out to the pulley, then attach it to your dog's collar.
