MOUNTING HARDWARE (3X)

CLEVIS PIN

FOOT PLATE

MANUAL

TRAILER VALET ESSENTIALS ELECTRIC JACK

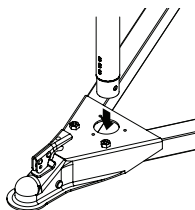

Rev 09.10.24

Quick Start Guide

NOTE: For proper grounding, remove paint from around one mounting hole on the Jack and the matching mounting hole on the trailer tongue. If the paint is thick, add a washer (sold separately) between the jack and trailer to provide good contact.

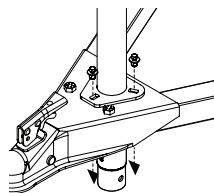

1.

Remove footplate and insert jack through the coupling plate in the desired position.

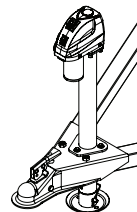

2.

Use the mounting hardware to secure the jack to the hitch coupling.

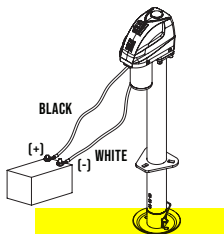

3.

Reinstall the foot plate onto the bottom of the jack.

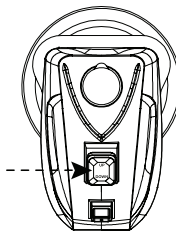

4.

Connect the WHITE ground wire to the negative (-) terminal. Then connect the BLACK wire lead from the jack directly to the positive (+) terminal.

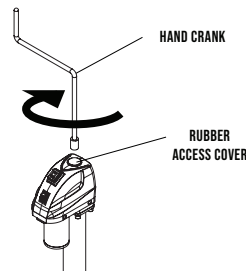

5.

POWERED OPERATIONS: Use the Control Switch to raise/lower the jack. Raise the jack all the way up to provide maximum ground clearance.

6.

MANUAL OPERATIONS: Disconnect the power and remove the rubber access cover. Insert the crank and rotate **counter-clockwise** to raise the trailer.

IMPORTANT SAFETY INFORMATION
