PDT 6:00pm~9:00pm (EDT 9:00pm~00:00am) from Monday to Friday. So, do not hesitate to contact us during this time frame, we will reply to you in 30 mins!

- Customer Support Team

INSTALLATION STEPS

1. Pass the lamp holder through the round linen shade and rattan shade, and install it on the ceiling base through the knob.
2. Use the screws to mount the bracket on the junction box. (If you don't have a junction box, you can drill two holes in the wall and put in two expansion pellets, and finally fix the bracket with self-tapping screws)
3. Connect the "L" wire to your "live" wire through the orange terminal caps and the "N" wire to your "neutral" wire, the copper wire needs to be wrapped around the green screw.
4. Align the two holes on the chassis with the screws on the bracket, and then tighten them with the matching nuts.
5. Screw on the light bulb.
6. Install the threaded rod under the lamp holder, tear off the films on both sides of the acrylic board, and then install it at the lower end of the lamp holder with nuts.

QUESTION & ANSWER

Q: After powering on, my lamp doesn't work. What should I do?

A: Please check whether the lamp is really powered on and the switch is on.

Please make sure the light bulb you are using is the good one.

Please check whether the copper pieces inside the bulb socket contacts well with your bulb.

None of these 3 steps? Just feel free to contact us for a replacement.
