

# Product Installation Manual

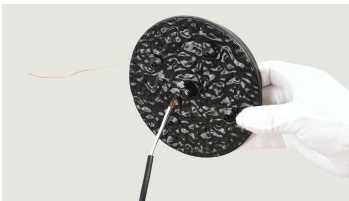

- 1 Check that all the accessories are complete. The style of the crystal pendants depends on your order.

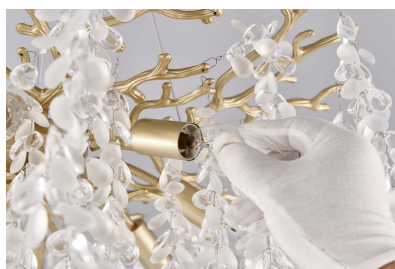

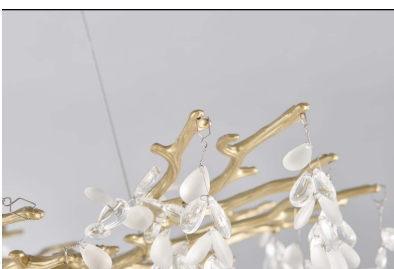

- 2 Install the branches as shown: start with the three branches equipped with suspension cables to ensure balanced support, then attach the remaining branches.

- 3 Next, install the central branch, followed by any extension branches if included (for larger-sized fixtures only).

- 4 Thread the power cord and suspension cables through the junction box. Tie a secure knot at the end of each suspension cable to prevent the fixture from slipping or falling.

- 5 Install the crystal pendants according to the hole position instructions on the product page, and install the E12 bulbs.
