

Exceptional Brightness: The Bosch GLA18VH-7500 delivers powerful illumination with a maximum output of 7500 lumens, featuring three brightness modes: low (2500 lumens), medium (5000 lumens), and high (7500 lumens) for versatile lighting solutions.

360° and 180° Lighting Options: Enjoy full coverage with 360-degree illumination or focus the light with 180-degree left and right modes, allowing you to adapt the lighting to your specific work environment.

Convenient User Interface: Easily control the light's settings with a highly visible user interface that includes controls for brightness levels and illumination range modes, along with a battery status indicator for monitoring power levels.

Hybrid Power Compatibility: This area light is compatible with Bosch's 18V battery platform and can also be powered by a 120V AC source, providing flexibility for various job site conditions.

Versatile Mounting Solutions: Designed for adaptability, the GLA18VH-7500 features a self-centering mounting hook, a non-threaded quick mount tripod hole, and a 5/8" threaded tripod mounting hole for easy positioning on any worksite.

Integrated USB-C Charging Port: Keep your mobile devices and measuring tools charged on the job with the built-in 15W USB-C charging port, ensuring you stay powered up throughout your workday.

AMPSHare™ system compatibility – 18V batteries and chargers are compatible with Bosch 18V power tools and a growing list of cordless products from AMPSHare™ brands

Limited warranty – Bosch 18V cordless power tools are covered by a five-year limited warranty for details, visit <https://rb-pt.io/PowerToolWarranty> or call 1-877-BOSCH99
