

Brisa for Sliding Patio Doors

The Brisa Screen for single sliding patio doors is uniquely configured for use with traditional 6'8" tall sliding patio doors. (Fig. A) This screen features unique mounting hardware and is specially sized so that the Screen Housing will rest and secure to the outer doorframe. The doorframe must have a surface to attach the mounting bracket screws. The distance between these screws is 78 1/2". (See Fig. C & D) Please see the following images.
