

nature's way

FARMS®

When given the right dose of care and attention, these green companions can truly thrive in the most delightful ways.

ALOCASIA DAWN VARIEGATED

Alocasia Dawn has a U.S Patent NO. PP35010 and cannot be reproduced or resold

light

Alocasia Dawn thrives in warm temperatures and indirect sunlight, do not place in full sun. It can be enjoyed indoors near a window or outdoors on a patio, porch or deck.

water

Water twice a week but keep an eye on the soil. If the soil feels dry to the touch when watering, increase watering schedule to three times a week.

fertilize

Alocasia Dawn is a slow to moderate grower, to give it a boost, add fertilizer every 6 months.

Every plant has a different pattern and ratio of color which makes each one unique.

Is an exotic **RARE** plant with striking color patterns and variations. Its large, heart shaped, glossy leaves marbled with tones of light green and white make this a unique plant and an ideal focal point for any patio, porch, deck or garden.

Although we hand select each plant and take great care in packaging it, some leaves turn yellow due to the stress of shipping. Simply trim those yellow leaves off of the plant upon arrival.

ENJOY YOUR #RAREPLANT

RARE.
