Please read this manual carefully before installation and use. Observe the warnings and precautions in the product manual.

⚠ Warnings

Always read the following safety instructions and warnings carefully before using this appliance to avoid the risk of fire, electric shock and personal injury.

- **Read before use:** Read all instructions before using this product.
- **Avoid Danger:** To avoid the risk of fire, electric shock or personal injury, strictly observe the following safety instructions and warnings.
- **Ventilation safety:** Never use this fan for ventilation in areas where flammable liquids or vapors (including paints), gasoline, varnishes, floor refinishing products or solvents are stored.
- **Plug fastening:** Ensure that the plug fits snugly into the socket to prevent overheating of the socket and risk of fire due to poor connection.
- **Unplug the power:** Always unplug the power cord when servicing, cleaning or moving. Do not solely rely on the ON/OFF switch to disconnect power.
- **Child safety:** When the fan is turned on or powered on, make sure children are not close enough to avoid accidents.
- **Turn off and unplug:** Always turn off and unplug the fan when not in use.
- **Power Requirements:** The power requirement for this fan is 120V AC, do not plug into 380V or other power sources.
- **Grounding Plug:** The power cord is equipped with a three-pronged grounded plug that must be inserted into a matching receptacle. Do not cut or replace the plug. If the wall is fitted with a two-pronged wall plug, it must be reinstalled with a properly grounded three-pronged plug in accordance with the relevant regulations.
- **Qualified installations:** Reinstallation of properly grounded three-prong outlets must comply with the National Electrical Code (NEC) and relevant local codes and standards, and this work must be done by a certified electrician.

⚠ caveat

- **Avoid overheating:** Do not use devices such as extension cords, electrical outlets, power plugs, or outlet air fresheners as this may cause overheating and fire hazards.
- **Ground safety:** Power cords should not be laid under carpets or furniture as they can be damaged or cause a fire hazard from overheating.
- **stable arrangement:** When in use, be sure to place the fan on a firm, flat and level surface to prevent tipping.
- **safe operation:** Do not stick fingers or objects into the grille opening while the fan is operating as this may cause injury or damage.
- **keep ventilated:** When in use, always make sure not to block or obscure the fan's inlet and outlet airflow ports.
- **humid environment:** Do not use this fan outdoors or in wet locations (such as bathtubs, swimming pools, etc.) to avoid the risk of electric shock.
- **Wire safety:** Do not run cords through carpets or under furniture; place them away from traffic areas where they cannot be easily tripped over.
- **Extension cord use:** Do not use a single extension cord to connect multiple fans or other electrical devices.
- **Damaged fan:** If you find that the fan is damaged or not working properly, stop using it.
- **special restrictions:** This fan is not intended for use in agricultural facilities or hazardous locations, so please be aware of the limitations of the relevant regulations.
- **radio interference:** This equipment complies with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. If interference occurs, try repositioning the equipment or seek professional assistance.
