48 pcs Drive Set

Extended Torsion Zone

Absorbs torque peaks to reduce breakage, and also comes with high-visibility sleeves for greater user convenience

Long Life

Impact Driver Bits have been upgraded to deliver 10X life over standard impact bits

Improved Visibility of Bits

The silver sleeve on the bit is designed for better visibility, in the toolbox or on the ground. Laser markings on the bit clearly identify bit type and are easier to read than stamped scripts.

Less Cam-out

CNC (Computer Numerical Control) manufactured precision-engineered tips have less cam-out than traditional forged tip

BUILD THE SET YOU WANT

1 CHOOSE PRE-FILLED OR EMPTY CASE

2 CHOOSE DESIRED CLIPS

3 INSERT AND SWAP CLIPS

Easily Accessible

The Custom Case System is designed to be the most straightforward approach to bit organization. The tilt-in/tilt-out mechanism makes it easier to get the bits in and out of the clip.

Durable and Secure

The case features rubber bumpers to make it more durable. It features a secure latch clip to ensure that the case is closed. It's built to stand up to the toughest jobsite conditions.

Customizable Convenience

This innovative bit system allows you to customize configurations, providing flexibility, efficiency and quick access. Take only the bits needed for a job, instead of the whole tackle box.

Best Case for the Best Bits

The Impact Tough™ driver bits include an Xtended Torsion Zone, which absorbs torque peaks to reduce breakage. The Impact Tough™ drill bits provide impact-rated shanks and tough construction.
