

How to Set Up and Care for Your Primo Water Rolling Cooler

Thanks for your purchase of a Primo Water Rolling Cooler. Here are some tips for setting up, using and cleaning your Rolling Cooler.

Setting Up the Cart

- 1 Unfold the cart by holding the cart handle and placing the wheels on the ground. While supporting the cart, grip the front of the square support base and pull it away from the rest of the cart. As the cart unfolds, the wheels will rotate. Press down firmly on the base until it clicks into place and the wheels are parallel to each other.
- 2 To extend the handle, grip the handle, squeeze the button and pull up on the handle until it clicks into place.
- 3 On the rear of the cart, open the storage compartment by inserting your finger into the round hole and pulling up. Remove the bungee cord from inside the compartment. You will use this cord to secure the bag to the cart after the bottle and bag are in place.

Setting Up the Bag, Water Bottle and Pump

- 4 Remove the bag from its plastic covering. Open the flap on the top. A cart sleeve is sewn into the back of the bag. Slide the sleeve over the cart handle to attach the bag to the cart.
- 5 Once the bag is positioned on the cart, for optimal cooling, place a small amount of ice or small ice packs in the bottom of the cooler bag. Place a 5-gallon water bottle inside, then cover the sides with ice or ice packs. (The bag will hold up to 5 pounds of ice.) Close the top cover, ensuring that the neck of the water bottle passes through the round hole previously covered by the flap. Zip the bag closed.
- 6 Unzip the accessory side pocket and place your Primo Water manual or electronic pump inside and zip to close. (Pumps are sold separately.)
Follow the instructions included with your Primo Water pump to attach the pump to the bottle.
- 7 Wrap the bungee cord around the front of the bag/bottle, and hook the ends of the bungee cord to the cart in the notches provided at the top or bottom of the handle.

Care Instructions

Let the bag dry completely before storing.

Clean the cart and bag with mild liquid detergent, water and a soft cloth. Do not machine wash the bag.

LIFE NEEDS WATER. MAKE IT PRIMO WATER.™
