

THE PAINT

YOU CAN

PEEL OFF

# Q&A

questions and answers

**UNIPAINIT®**

## Questions & Answers

### What is Unpaint?

Unpaint is a revolutionary paint technology that allows for easy and clean removal from surfaces. It is environmentally friendly, using Glasstommer as its base technology.

### What surfaces can Unpaint be applied to?

Unpaint can be applied to a wide range of surfaces, including drywall, wood, metal, plastic, and more. It is recommended to test a small area before applying it to ensure compatibility and proper adhesion. Unpaint cannot be applied on textiles.

### How is Unpaint applied?

Unpaint can be applied using a brush, roller, or sprayer. The surface should be clean, dry, and free of any dirt or debris before application. For best results, apply a wet film thickness of about 0.01 inch.

### How long does Unpaint take to dry?

Unpaint typically dries within 30 minutes to touch, but to recoat, we recommend waiting at least 2 hours, depending on the thickness of the application and environmental conditions.

### Can Unpaint be tinted to a custom color?

Unpaint can be tinted to a custom color using universal colorants. It is recommended to test a small area to ensure the desired color is achieved.

### Can Unpaint be used on textured surfaces?

Unpaint can be used on textured surfaces, but it is recommended to test a small area to ensure proper adhesion.

### Does Unpaint have a strong odor?

Unpaint may have a strong odor for some and for others it can smell very good when applied, but it airs out quickly when it dries.

## **Will Unpaint peel off prematurely?**

Unpaint should adhere properly if applied correctly, and is guaranteed to peel off easily up to a year after application. However, if applied over drywall or walls that have been painted for a very long time and the underlying paint is cracked or peeling, we do not recommend applying Unpaint in those cases.

## **How durable is Unpaint?**

Unpaint is guaranteed to peel off easily up to a year after application, making it perfect for short-term projects or when the ability to remove the coating is desired.

## **How easily does Unpaint peel off?**

Unpaint is guaranteed to peel off easily up to a year after application if applied correctly. We recommend peeling it off at an angle of 180 degrees for best results.

## **Can Unpaint be removed from surfaces without leaving any residue?**

Yes, Unpaint can be removed from surfaces without leaving any residue.

## **Can masking tape be used with Unpaint?**

Yes, masking tape can be used with Unpaint, but it should be removed before the Unpaint dries to avoid peeling the Unpaint off with the tape.

## **How should tools be cleaned when used with Unpaint?**

The only way to clean the roller or sprayer used with Unpaint is with soapy water, using liquid laundry soap.

## **Is Unpaint environmentally friendly?**

Yes, Unpaint is environmentally friendly due to its base technology, Glasstommer.

## Can Unpaint be applied over wallpaper?

Unpaint can adhere to wallpaper, but it is not recommended. When removed, the Unpaint may damage or peel the wallpaper.

## How does Unpaint compare to traditional paint in terms of cost?

Unpaint is competitively priced compared to traditional paint, and its ease of removal can result in cost savings.

## How should Unpaint be stored?

Unpaint should be stored in a cool, dry place, away from direct sunlight and heat sources.

## Can Unpaint be used for commercial purposes?

Yes, Unpaint can be used for commercial purposes, and is particularly useful for events or short-term projects where a clean removal is desired.

## Is it necessary to prime the surface before applying Unpaint?

Yes. The Unpaint primer is recommended, especially as a base for vibrant colors made with a transparent base.

## Can Unpaint be applied to outdoor surfaces?

Unpaint is not recommended for use on outdoor surfaces. Exposure to weather and moisture can cause the Unpaint to peel or deteriorate.
