

LG ThinQ UP

Coming Soon...

Life on the UP with LG ThinQ UP

Offering you your choice of the innovations that best fit your lifestyle.

Customize and Renew your LG Appliances

LG ThinQ UP offers personalized updates that unlock the potential of your LG appliance. Imagine having an ever-changing, ever-improving appliance that can do more, get better, and always feels like new.

LG Refrigerators

Dim the inside light or add gradual illumination so you aren't blinded during your midnight snack run.

Delay the open-door chime so you always have enough time to find what you are looking for.

LG Dishwashers

Add a Quiet Mode for those times you need your LG dishwasher to be even quieter than it already is.

Change the complete melody so your favorite tune plays when your dishes are clean and dry.

LG Washing Machines

Got a new fur baby? Download a Pet Care cycle to keep all of your clothes fur-free and fresh-smelling.

Add a special splash screen on startup for the holidays, as a special reminder, or to make someone's day.

LG ThinQ UP works seamlessly with ThinQ® and ThinQ Care to monitor, control, care for, and now customize and renew your LG appliances.
