# SMARTCORE® PRO

Each piece of coordinating Smartcore®PRO molding is 94" long and composed of a waterproof core wrapped in vinyl. The molding can be cut to desired length using a fine-toothed finishing saw blade.

When installing, we recommend using Loctite PL 3X Premium Construction Adhesive (or equivalent). Scuff the underside of the part to receive adhesive with sandpaper and apply in "S" pattern. Use weight to apply pressure until fully cured (usually 48 hours). An alternative method is to use double-sided molding tape such as Hilway Direct Molding Tape. If you choose to use nails (not recommended), carefully pre-drill pilot holes for the nails.
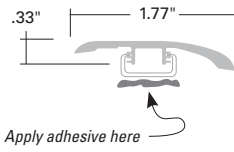

T-MOLDING

.33" 1.71"

Apply adhesive here

This t-shaped transition piece covers the narrow gap in a doorway between two adjacent floors that are on the same level.

Cut T-molding and Track to same desired length. Secure Track to floor with glue or molding tape, and press or tap T-molding into Track to desired depth using rubber mallet.
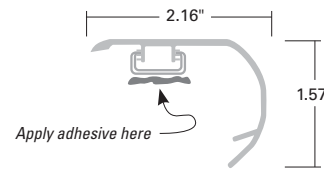

MULTI REDUCER

.33" 1.77"

Apply adhesive here

This is used to transition from a higher-profile (or thickness) floor to a lower-profile floor.

Cut Reducer and Track to same desired length. Secure Track to floor with glue or molding tape, and press or tap Reducer into Track to desired depth using rubber mallet.

STAIR CAP

2.16" 1.57"

Apply adhesive here
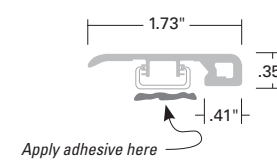

Used when installing Smartcore® PRO on stairs, providing the finishing touch to the front stair edge.

Cut Stair Cap and Track to same desired length. Secure Track to floor with glue or molding tape, and press or tap Stair Cap into Track to desired depth using rubber mallet.
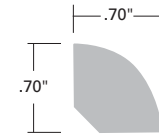

BABY THRESHOLD

1.73" .35" .41"

Apply adhesive here

Used to transition from hard surface floors to floors of a different height level or thickness.

Cut Threshold and Track to same desired length. Secure Track to floor with glue or molding tape, and press or tap Threshold into Track to desired depth using rubber mallet.

QUARTER ROUND

.70" .70"

Used to create finishing touch between floor and baseboards.

Measure and cut to fit. Affix molding using glue, molding tape or nails. When using adhesive, be sure to follow manufacturer's instructions completely.
