

# Cleaning & Maintenance Guide

G-Floor® Vinyl Flooring is made from 100% polyvinyl and provides lasting durability. Easy installation and low maintenance make our floors the perfect protective solution for years to come.

Like any sound investment, owners of rollout garage flooring must perform occasional maintenance to extend the life of their floor. It is important that owners keep a clean floor to obtain maximum performance. Although it is very easy to clean your rollout floor, not following the proper procedures could lead to stains or slippage. With a little time and little effort, your vinyl flooring will remain looking as good as new for years to come.

## ROUTINE CLEANING

Our rollout flooring is both easy to install and easy to clean. Whether it is being used in your garage, shed, workshop or a room in your home, these steps will help keep your product looking great. You can clean your floor in the garage, or simply move it outdoors to wash off.

1. Sweep or vacuum regularly. Avoid using the beater bar.
2. Clean up spills immediately. Although our floors are there to protect, you still want to be proactive in removing anything that could cause damage or stains.
3. Use cool water and household soap or detergent to clean to remove stains
4. Wipe away any debris using a damp mop, soft push broom, or squeegee
5. Remove any excess cleaner to prevent build up
6. Allow floors to dry before proceeding with traffic.

## HEAVY CLEANING FOR STAINS

Our floors surface is ultra-durable to withstand vehicle traffic; however, vinyl is not a stain proof material. Certain dyes, inks, rubber based material, and chemicals may cause permanent staining. Keep in mind that if you do not use a slip resistant floor cleaner, the surface of your floor may become slick.

1. Sweep or vacuum the affected area to remove debris, dust and grit.
2. Clean up spills immediately. If you have tough stains prepare a cleaning solution – we recommend diluting the chemical cleaner with clean, warm water.
3. Apply to the stain and let sit for 2-3 minutes.
4. Use soft bristle scrub brush if needed
5. Wipe away stain or excess with clean towel – we recommend a soft microfiber towel.
6. Rinse to remove any remaining residue.
7. Allow to air dry

## RECOMMENDED PRODUCTS AND TOOLS FOR CLEANING

- Wet/Dry Vacuum
- Soft Bristle Brush
- Broom
- Power washer
- Mop
- Household cleaners that are vinyl safe – Diluted dish soap is a great option!

## HELPFUL HINTS AND MAINTENANCE

- Never push or drag furniture across floors. Always lift and carry!
- Use a quality floor mat, such as our Vinyl Anti-Fatigue Mat, for extra protection outside of entrances and exits to limit what is tracked in on your floors.
- Avoid harsh chemicals, abrasive scrubbers, or steel wool.
- Always clean up spills immediately!
