### PRODUCT DESCRIPTION

The ArmorPoxy Fast Set Epoxy Patch Kit is a 3-component kit of special, fast-curing A & B resin and aggregate. All three components get mixed together to form a 'mortar' that gets applied to fill cracks, holes, spalling, fissures, and any other concrete irregularity.

### APPLICATION INSTRUCTIONS

Mix only an amount of material that can be used in 1 minute if mixing by hand. Apply a thin layer of the mixed liquids onto the concrete. Sprinkle dry sand onto the repair area until the level of sand fills the hole and levels the repair area until level with the rest of the floor surface. Then saturate the sand with the mixed liquid. Reapply more sand and liquid as needed until the area is built up level to floor. Finally, trowel the floor to smooth out the area and remove any excess material. Allow the material to cure for 15 - 20 minutes before foot traffic. For heavy equipment such as fork trucks, allow the material to cure for an hour before using area that has been patched.

### Mix Ratio

1 to 1 by volume

#### WARRANTY AND DISCLAIMER

We warrant that our products are manufactured to strict quality assurance specifications and that the information supplied by us is accurate to the best of our knowledge. Such information supplied about our products is not a representation or a warranty. It is supplied on the condition that you shall make your own tests to determine the suitability of our product for your particular purpose.
