Metal Legs x 4

Charger x 1

Screws x 16

Installation location
A 1~5 CM
B can be averaged visually
After confirming the position,
lock the self-tapping screw

Functions

Support mobile phones with wireless charging function on the market. The phone can be charged by placing it in the corresponding area.

No indicator light: the table is not powered on
Blue light: the table is powered on and in standby status
Red light: the wireless charging is working

Operations
Short press the switch to turn on the light
Short press again to switch the light color
Long press to adjust brightness
Short press after a while to turn off the light

There are 1 x USB & 1 x Type C ports in 1 panel.
These non-wireless-charging enabled devices could be charged via these ports

The two speakers would be installed on the left and right sides of table respectively
You could enjoy the pleasant music via blue-tooth speaker. Blue-tooth name: YUN CUBZ1 Passwords: 1234

Fingerprint locking is strictly prevented and controlled for safety and worry-free.

TWS function: first, power off both tables completely. Then, plug in the power of the first table and plug in the power of the 2nd table within 20 seconds. After that, wait for about 30 seconds and use your phone to connect the table's Bluetooth named as "YUN CUBZ1." Click on it to connect and enter the password "1234." (Note: 1. If your phone has connected to this Bluetooth before, you need to delete the previous connection and follow the above steps. 2. If you find two Bluetooth devices with the same name, repeat the power on steps for both tables.)
